IMPORTANT CHANGES

Caterer's Purchase of Disposable Products. Effective September 1, 2011, disposable items provided free by a caterer to customers with the required purchase of taxable products may be purchased without tax for resale. Page 27.

SNAP (EBT, Food Stamps). Information has been added to explain how to treat sales to customers using an EBT card. Examples are provided. Page 46.

CAUTION

- The information in this publication reflects interpretations by the Wisconsin Department of Revenue of laws enacted by the Wisconsin Legislature and in effect on September 1, 2013. Laws effective after that date, new administrative rules, and court decisions may change the interpretations in this publication.
- The examples and lists of taxable and nontaxable sales and purchases provided in this publication are not all-inclusive. They merely set forth common examples.

I. INTRODUCTION

A. General

This publication explains how Wisconsin sales and use taxes affect grocers.

Note: Certain sales and purchases by grocery stores which are subject to the 5% state sales and use tax may also be subject to the: (a) 0.5% county sales and use tax, (b) 0.1% baseball stadium sales and use tax, (c) 0.5% football stadium tax, (d) 0.5% food and beverage local exposition tax, and (e) 0.5% (1% for the City of Wisconsin Dells and the Village of Lake Delton) premier resort area sales tax. Additional information about these taxes is contained in the following:

- (1) County tax: [Publication 201](#), *Wisconsin Sales and Use Tax Information*.

- (2) Baseball and football stadium tax: [Publication 201](#), *Wisconsin Sales and Use Tax Information*, applies to sales and purchases made in Brown, Milwaukee, Ozaukee, Racine, Washington, and Waukesha counties.
- (3) Local exposition taxes: [Publication 410](#), *Local Exposition Taxes*, applies to sales and purchases of certain lodging, food and beverages, and car rentals in municipalities wholly or partially within Milwaukee County.
- (4) Premier resort area tax: [Publication 403](#), *Premier Resort Area Tax*, applies to sales by certain types of retailers of any of the products described in Part I.D.1. through 4. on page 7, and taxable services in the premier resort areas.

B. Seller's Permit

1. Who Needs a Seller's Permit?

Every person engaged in the business of selling, licensing, leasing, or renting the products listed in Part I.D.1. through 4. on page 7, or taxable services in Wisconsin must have a seller's permit for each location, unless all sales by the seller are exempt from sales and use tax. The seller's permit shows that a person is properly registered with the Department of Revenue, as required by law. See [Publication 201](#), *Wisconsin Sales and Use Tax Information*, for additional information about obtaining a seller's permit.

2. Applying For a Permit

Application for a seller's permit may be made using any of the following methods

- Use the Department of Revenue's online [Business Tax Registration Process](#) to submit the application electronically.
- Register through the [Streamlined Sales Tax Governing Board's website](#).
- Complete [Form BTR-101](#), *Application for Business Tax Registration*, and mail it to the Department of Revenue. Keep a copy

of the completed application for your records.

Note: It is important that you fill in all the requested information in the online application on the Streamlined Governing Board's website or on Form BTR-101.

If two or more activities are conducted by you at the same business location, only one permit is required. For example, if you have a service station and a grocery store at the same location, only one seller's permit is required for both businesses.

If you have more than one business location where you make retail sales, a separate seller's permit is needed for each location. You should, however, file only one application for all locations.

"Location" is determined by the address. A different street address means a separate location.

A seller's permit is not transferable and is not valid at any other location.

C. Filing Tax Returns and Payment of Tax

1. How Often Must Returns be Filed?

Grocery stores holding a seller's permit must file a sales and use tax return (Form ST-12) for each reporting period, even if they have no tax due for that period. A reporting period may be monthly, quarterly, or annually, depending on the grocery store's tax liability. The department notifies permit holders of their reporting period and the due date for filing the returns.

Wisconsin sales and use tax returns must be filed using one of the electronic filing methods listed in Part I.C.2. A seller that is unable to file electronically may request a waiver from the Department of Revenue. A waiver will be granted if the requirement to file electronically causes an *undue hardship*. An example of an undue hardship is the onset of

a disabling illness or injury. Your request for a waiver must be **in writing**. The request should indicate the business name, tax account number, and the reason why your sales and use tax returns cannot be electronically filed. Requests can be:

- Emailed to:
DORWaiverRequest@revenue.wi.gov;
- Faxed to: (608) 267-1030; or
- Mailed to:
Wisconsin Department of Revenue
Mandate Waiver Request, MS 5-77 P.O.
Box 8949, Madison, WI 53708-8949

Additional information is available at: revenue.wi.gov/eserv/rule.html#sales; or you may contact the department by email at: DORSalesandUse@revenue.wi.gov; or by telephone at (608) 266-2776.

If you have been granted a waiver, a return will be mailed to you shortly before the end of each reporting period. If you do not receive your return within 15 days after the end of the reporting period, contact the Department of Revenue at (608) 266-2776 to request a return for that reporting period.

2. Electronic Filing and Payment Options Available for Sales and Use Tax Returns

a. *My Tax Account*

[My Tax Account](#) is a free Internet-based taxpayer service that allows you to file and pay your sales and use taxes electronically. It performs the necessary computations of tax based on information that you enter and allows you to make your tax payment via electronic funds transfer, credit card, or paper check. [My Tax Account](#) also allows you to:

- View business tax filing and payment history and identify any tax periods that need attention.
- Change your address, obtain an extension to file a return or inactivate your account.

- File a buyer's claim for refund of sales tax paid to a seller in error.
- Appeal adjustment notices.

To use [My Tax Account](#), you must obtain a logon ID and password from the Department of Revenue. Go to the [My Tax Account Common Questions](#) on the Department of Revenue's website for more information, including how to obtain your logon ID and password.

b. Sales TeleFile

You can file your Wisconsin sales and use tax return with any touch-tone telephone. This program accepts four payment types: Direct withdrawal (only available during the call in which you file your return), credit card, check, or money order. To use TeleFile, obtain a Sales TeleFile [Worksheet & Payment Voucher](#). When you have completed the worksheet, call (608) 261-5340 to actually file your return.

c. eFile Transmission

This program is a service for taxpayers using approved private vendors' software or who have the technical expertise to create a file in XML format. eFile transmission places return data into a file format that can be directly processed into the Department of Revenue system. Using secure transmission over the Internet you can submit a payment at the same time that you file your return using ACH debit or ACH credit. You will receive an email acknowledgement to confirm receipt of a successful file transmission. Information about file transmission can be found on the Department of Revenue's website at: revenue.wi.gov/eserv/eftgen.html.

d. Questions?

More information on all of the above services can be found under the ["Business"](#)

or ["Online Services"](#) sections of the Department of Revenue website. If you have questions about electronic filing or payments, contact the department by writing to Wisconsin Department of Revenue, Electronic Funds Transfer Assistance, Mail Stop 3-80, P.O. Box 8946, Madison, WI 53708-8946; calling (608) 266-2776; or emailing to DOR-SalesandUse@revenue.wi.gov.

D. Tax Rate

The tax rate of 5% is the same for both the Wisconsin sales and use tax. Sales tax is based upon the sales price from retail sales, licenses, leases, or rentals of the following, and use tax is based upon the purchase price of the following:

1. Tangible personal property;
2. Coins or stamps of the United States that are sold, licensed, leased, rented, or traded as collector's items above their face value;
3. Leased tangible personal property that is affixed to real property, if the lessor has the right to remove the leased property upon breach or termination of the lease agreement, unless the lessor of the leased property is also the lessor of the real property to which the leased property is affixed; and
4. Specified digital goods, additional digital goods, and digital codes. These digital goods are characterized by the fact that they are transferred electronically to the purchaser (i.e., accessed or obtained by the purchaser by means other than tangible storage media). "Specified digital goods" means "digital audio works," "digital audiovisual works," and "digital books." "Additional digital goods" means greeting cards, finished artwork, periodicals, video or electronic games, and newspapers or other news or information products. See [Publication 240](#) for a description of the products that are included.

In addition, certain services are subject to the 5% sales and use tax. For a list of taxable services, see Part X.B. of [Publication 201](#).

Note: Additional local taxes may apply to your sales and purchases as explained in Part I.A. on page 5.

E. Difference Between the Wisconsin Sales and Use Tax

1. Sales Tax

The Wisconsin sales tax is a 5% tax imposed on a retailer's receipts from selling, licensing, leasing, or renting, at retail, the products listed in Part I.D.1. through 4. on page 7, and from selling, performing, or furnishing taxable services at retail in Wisconsin, unless a specific exemption applies. All sales are considered taxable retail sales, unless the seller receives an exemption certificate claiming resale ([Form S-211](#)) or other appropriate exemption information from the buyer prior to or within 90 days after the date of the sale.

Example: Sales of canned soft drinks to a customer by a grocery store are subject to Wisconsin sales tax. However, sales of soft drinks by the bottler to the grocery store are not subject to Wisconsin sales tax because the grocery store is going to resell the soft drinks. In order to purchase the soft drinks from the bottler without tax, the grocery store must provide an exemption certificate claiming resale to the bottler.

2. Use Tax

The Wisconsin use tax is a 5% tax imposed on the purchase price of the items listed in Part I.D.1. through 4. on page 7, and taxable services that are used, stored, or consumed in Wisconsin and upon which a Wisconsin sales or use tax has not previously been paid.

Example 1: A grocery store purchases floor cleaner for \$5, as an inventory item for resale, and does not pay sales or use tax at the time of purchase. Rather than reselling the

floor cleaner, the grocery store uses the floor cleaner to clean its own floors. Since the grocery store did not resell the floor cleaner, the grocery store is required to remit use tax to the department on its purchase price of the floor cleaner (\$5). The use tax of \$0.25 ($\$5 \times 5\%$ state tax rate = \$0.25) is due with the sales and use tax return the grocery store files with the department that covers the date the floor cleaner is first used in Wisconsin.

Example 2: A grocery store purchases a cash register for \$500 from a seller located outside of Wisconsin. The seller does not charge the grocery store sales or use tax. The grocery store is required to remit use tax to the department on its purchase price of the cash register (\$500). The use tax of \$25 ($\$500 \times 5\%$ state tax rate = \$25) is due with the sales and use tax return the grocery store files with the department that covers the date the cash register is first stored, used, or consumed in Wisconsin.

Example 3: A grocery store purchases a cash register for \$1,000 from a seller located outside of Wisconsin. The seller does not charge the grocery store sales or use tax. The cash register is stored in Wisconsin by the grocery store. The store later decides to use the cash register at one of its locations outside of Wisconsin. Since the cash register was first stored in Wisconsin (even though it was subsequently used outside of Wisconsin), the grocery store is required to remit use tax to the department on its purchase price of the cash register (\$1,000). The use tax of \$50 ($\$1,000 \times 5\%$ state tax rate = \$50) is due with the sales and use tax return the grocery store files with the department that covers the date the cash register is first stored, used, or consumed in Wisconsin.

II. DEFINITIONS RELATING TO FOOD AND FOOD INGREDIENTS

A. "Candy" is defined in [sec. 77.51\(1fm\)](#), Wis. Stats., to mean "...a preparation of sugar, honey,

or other natural or artificial sweetener combined with chocolate, fruit, nuts, or other ingredients or flavorings in the form of bars, drops, or pieces. 'Candy' does not include a preparation that contains flour or that requires refrigeration."

To be "candy," an item must be sold in the form of a bar, drop, or piece. Products that are not sold in the form of bars, drops, or pieces are not "candy." Common examples of items that are not "candy" because they are not sold in the form of bars, drops, or pieces include cotton candy, pixie sticks, spray candy, frosting in containers, and cake icing in tubes.

Natural and artificial sweeteners include corn syrup, dextrose, invert sugar, sucrose, fructose, sucralose, saccharin, aspartame, stevia, fruit juice concentrates, molasses, evaporated cane juice, rice syrup, barley malt, honey, maltitol, and agave.

If the ingredient label on the product specifically lists the word "flour," the product is not "candy." Flour substitutes are not "flour" for purposes of determining whether a product meets the definition of candy.

Items that require refrigeration are not "candy." However, items that meet the definition of candy but which are sold frozen or refrigerated for the preference of the customer or retailer are still "candy."

Example: A grocery store sells candy bars at room temperature or from a refrigerated display case. The candy bars are not required to be refrigerated. Since the candy bars are not required to be refrigerated, the sales of both types of candy bars (candy bars sold at room temperature and candy bars sold from the refrigerated display case) meet the definition of "candy."

Items that do not require refrigeration before they are opened, but require refrigeration after they are opened, are not candy.

Example: A grocery store sells cans of sliced peaches in heavy syrup. The cans of sliced

peaches do not require refrigeration before they are opened. However, once opened, the sliced peaches are required to be refrigerated. Therefore, the cans of sliced peaches do not meet the definition of "candy."

B. "Dietary supplement" is defined in [sec. 77.51\(3n\)](#), Wis. Stats., to mean a product other than tobacco, that is intended to supplement a person's diet, if all of the following apply:

- (1) The product contains a vitamin, mineral, herb or other botanical, amino acid, dietary substance that is intended for human consumption to supplement the diet by increasing total dietary intake, concentrate, metabolite, constituent, or extract, or any combination thereof.
- (2) The product is intended for ingestion in tablet, capsule, powder, soft-gel, gel-cap, or liquid form, or, if not intended for ingestion in such forms, is not represented as conventional food and is not represented for use as the sole item of a meal or diet.
- (3) The product is required to be labeled as a dietary supplement as required under [21 CFR 101.36](#).

Dietary supplements can be identified by the "Supplement (al) Facts" box found on the label as required by [21 CFR 101.36](#), as opposed to a "Nutrition (al) Facts" box found on the labels of other foods and food ingredients.

Dietary supplements include antioxidants, bee pollen, enzymes, garlic capsules, ginseng tablets, herbal supplements, immune supports, lecithin capsules, metabolic supplements, vitamins and minerals, and zinc lozenges.

C. "Food and food ingredient" is defined in [sec. 77.51\(3t\)](#), Wis. Stats., to mean "...a substance in liquid, concentrated, solid, frozen, dried, or dehydrated form, that is sold for ingestion, or for chewing, by humans and that is ingested or chewed for its taste or nutritional value. 'Food and food ingredient' does not include alcoholic beverages or tobacco."

Items such as cough drops, breath sprays, and throat lozenges, although they are ingested or chewed, are not food and food ingredients. Generally, these types of products will not have a “Nutrition (al) Facts” box on the label and are subject to Wisconsin sales or use tax since they are tangible personal property.

Note: The terms “candy,” “dietary supplement,” “prepared food,” and “soft drink,” as defined in this Part II., each represent a specific type of “food or food ingredient,” as defined in Part II.C.

D. “Prepared food” is defined in [sec. 77.51\(10m\)](#), Wis. Stats., to mean any of the following:

1. *Food and food ingredients sold in a heated state.*

Food and food ingredients are sold in a heated state if they are sold at a temperature that is higher than the air temperature of the room or place where the item is sold. Food and food ingredients that are sold unheated by the retailer and heated by the customer are not sold in a heated state.

Example 1: A retailer cooks chicken using a rotisserie. The retailer then sells these chickens in a heated state. The sale of the heated rotisserie chicken is the sale of prepared food.

Example 2: Customer purchases a donut from Grocer in an unheated state. Grocer has a microwave that customers can use to heat the food and food ingredients they purchase, if they so desire. Customer uses the microwave to heat the donut and then takes the heated donut to the register and pays for it. The donut sold by Grocer is not sold in a heated state since the donut was not heated by Grocer.

2. *Food and food ingredients heated by the retailer, except for the following:*

- (a) *Two or more food ingredients that are mixed or combined by a retailer for sale as a single item, if the retailer’s primary*

classification in the North American Industry Classification System (NAICS), 2002 edition, published by the Federal Office of Management and Budget, is manufacturing under subsector 311, but not including bakeries and tortilla manufacturing under industry group number 3118.

Example: A food manufacturer classified under industry code 31161 of the North American Industry Classification System NAICS), 2002 edition, makes hot dogs by mixing and combining two or more food ingredients, heating the hot dogs so that they are fully cooked and then packaging the hot dogs for sale once they have cooled. Although the hot dogs were previously heated by the retailer while they were being manufactured, they are not prepared food because the retailer’s primary classification in the 2002 NAICS is manufacturing under subsector 311, assuming the hot dogs do not meet any of the other definitions of prepared food.

- (b) *Bakery items made by a retailer, including breads, rolls, pastries, buns, biscuits, bagels, croissants, donuts, danish, cakes, tortes, pies, tarts, muffins, bars, cookies, and tortillas.*

Example 1: A bakery mixes ingredients together to make a cake. The cake mix is then heated (baked). Once the cake cools, it is decorated and sold to a customer. Although the cake was heated by the retailer, it is not prepared food because it meets the exception for bakery items. This also assumes the cake does not meet any of the other definitions of prepared food.

Example 2: A bakery mixes two or more ingredients together to make a bagel. The bagel is then heated and placed in a heated display case for sale to a customer. The bagel is prepared food

since it is sold heated. Although the bagel meets the exception for bakery items, it is prepared food since it is sold heated.

- (c) *Two or more food ingredients mixed or combined by a retailer for sale as a single item, sold unheated, and sold by volume or weight.*

Note: *Examples 1-7, below, assume that it is not the retailer's customary practice to physically give or hand napkins or other utensils to the customer with the food product; plates, bowls, glasses, or cups are not necessary to receive the food product; and the retailer's NAICS code is not subsector 311 or 3118.*

Example 1: Grocery Store prepares potato salad for sale to its customers. Grocery Store boils the potatoes cuts the potatoes up, and combines the potatoes with various other ingredients to make potato salad. At the customer's request, Grocery Store places a certain amount of potato salad into a container. When the customer is satisfied with the amount of potato salad in the container, Grocery Store weighs the container and prints out a label that contains the weight and the price. The price is equal to \$3 per pound. Although the potatoes were previously heated by the retailer when the potato salad was being made, the potato salad is not prepared food since it is sold unheated by weight.

Example 2: Same as *Example 1*, except that Grocery Store prepackages the containers of the potato salad rather than having the customer select the amount she wants. The potato salad is not prepared food since it is sold unheated by weight.

Example 3: Same as *Example 1*, except that customer tells Grocery Store which size container of potato salad she wants.

Grocery Store charges \$1.79 for a 1/2 pint size container, \$2.89 for a pint size container, and \$5.49 for a quart size container. The potato salad is not prepared food since it is sold unheated by volume.

Example 4: Same as *Example 3*, except that Grocery Store prepackages the containers of the potato salad into the 1/2 pint, pint, and quart size containers as it is made, rather than upon the customer's request. The potato salad is not prepared food since it is sold unheated by volume.

Example 5: Ice Cream Store makes its own ice cream by mixing and combining the ingredients. Ice Cream Store charges \$2.50 for a small container and \$5.50 for a large container. Each container is filled to the top. The actual weight or volume associated with each size container is not identified. The ice cream is prepared food. It is not sold by weight or volume.

Example 6: Same as *Example 5*, except that Ice Cream Store indicates that the small container is a pint and the large container is a quart. The ice cream is not prepared food since it is sold by volume.

Example 7: Store makes and sells ice cream cakes, which are not primarily bakery items. Store charges \$6.99 for a 4-inch ice cream cake, \$12.99 for a 9-inch ice cream cake, and \$16.99 for a 12-inch ice cream cake. The ice cream cakes are prepared food. They are not sold by weight or volume. Instead, they are sold by diameter.

3. *Two or more food ingredients mixed or combined by the retailer for sale as a single item, except if any of the following apply:*

- (a) *The retailer's primary classification in the North American Industry Classifica-*

tion System, 2002 edition, published by the Federal Office of Management and Budget, is manufacturing under subsector 311, but not including bakeries and tortilla manufacturing under industry group number 3118.

See *Example* following 2.(a) above.

- (b) *The item is sold unheated and sold by volume or weight.*

See *Examples* following 2.(c) above.

- (c) *The item is a bakery item made by the retailer, including breads, rolls, pastries, buns, biscuits, bagels, croissants, donuts, danish, cakes, tortes, pies, tarts, muffins, bars, cookies, and tortillas.*

See *Examples* following 2.(b) above.

- (d) *The food and food ingredients are only sliced, repackaged, or pasteurized by the retailer.*

Example 1: Grocer sells meat at its deli counter. A customer selects the type of meat he wants to purchase. The employee at the deli counter slices the amount the customer wants and wraps it after it is sliced. This meat is not prepared food since the meat is only sliced and repackaged, assuming the meat does not otherwise meet the definition of prepared food.

Example 2: Grocer sells cheese trays. The cheese trays are put together by the grocer selecting the various types of cheeses it wants to include on the tray, slicing the amount of each type of cheese it wants to include, placing each type of sliced cheese on the tray, and then wrapping the cheese tray. The cheese tray is not prepared food since the cheese on the tray was only sliced and repackaged, assuming the cheese tray does not otherwise meet the definition of prepared food.

- (e) *The item contains eggs, fish, meat, or poultry in raw form that requires cooking by the consumer, as recommended by the Food and Drug Administration in Chapter 3, Part 401.11 of its food code to prevent food-borne illnesses.*

Example: Grocer seasons and marinates various types of meat. The meat is required to be cooked by the customer, as recommended by the Food and Drug Administration. This meat is not prepared food since it is a meat that requires cooking by the consumer. This assumes the meat does not otherwise meet the definition of prepared food.

- 4. *Food and food ingredients sold with eating utensils that are provided by the retailer of the food and food ingredients, including plates, bowls, knives, forks, spoons, glasses, cups, napkins, or straws. However a "plate" does not include a container or packaging used to transport the food and food ingredients.*

- (a) Eating utensils are provided by the retailer if any one of (1) through (3) applies:

- (1) The retailer's customary practice is to physically give or hand the utensils to the purchaser, except that plates, glasses, bowls, or cups that are necessary for the purchaser to receive the food and food ingredients need only be made available to the purchaser.

Example 1: Grocer sells milk from a dispenser. Grocer has cups available for the purchaser to use to purchase the milk from the dispenser, Grocer has cups available for the purchaser to use. The sale of the milk from the dispenser is the sale of prepared food since a cup is necessary for the purchaser to receive the milk and the cups are made available to the purchaser.

Example 2: Grocer has a self-service salad bar. Customers go to the salad bar, pick up a clam shell container at the salad bar, and place the items they would like in the clam shell container. The clam shell container is a plate or bowl necessary for the customer to receive the food. Therefore, sales from the self-service salad bar are sales of prepared food.

- (2) The retailer's sales of prepared foods described in Part II.D.1., 2., and 3. on pages 10 through 12, and food for which plates, bowls, glasses, or cups are necessary to receive the food or food ingredients, are more than 75% of the retailer's total sales of all food and food ingredients and eating utensils are made available to the purchaser. (**Note:** See Part II.D.4.(b) on pages 13 to 14 to determine how to compute the percentage of prepared food sold by the retailer.); or
- (3) The retailer sells food items that have a utensil placed in a package by a person other than the retailer, unless the primary classification in the North American Industrial Classification System (NAICS), 2002 edition, published by the federal office of management and budget, of the person who placed the utensil in the package is manufacturing under subsector 311.

Example 1: Retailer sells a food item that contains a spoon that was placed in the package by the manufacturer of the food item. The manufacturer's NAICS Code is under subsector 311. Retailer A is not selling prepared food, since the spoon was placed in the package with the food by the manufacturer whose NAICS Code is under subsector 311.

Example 2: Same as *Example 1* except that the person who placed the spoon in

the package with the food is not a manufacturer under subsector 311. Retailer's sale of this food item is a sale of prepared food, since the spoon was placed in the package by a person other than a manufacturer under subsector 311.

- (b) (1) The numerator of the percentage described in Part II.D.4.(a)(2) on page 13 only includes the retailer's sales of prepared food as defined in Part II.D.1., 2., and 3. on pages 10 through 12, and food for which plates, bowls, glasses, or cups necessary to receive the food are made available.
- (2) The denominator of the percentage described in Part II.D.4.(a)(2) on page 13 is made up of all of the retailer's sales of food and food ingredients, including the retailer's sales of prepared food, candy, dietary supplements, and soft drinks.
- (3) Alcoholic beverages are not included in the numerator or denominator.
- (4) A retailer must compute the percentage under Part II.D.4.(a)(2) on page 13 for the retailer's current tax or business fiscal year based on the retailer's data from the retailer's prior tax or business fiscal year, as soon as practical after the retailer's accounting records are available, but no later than 90 days after the day on which the retailer's tax or business fiscal year begins.
- (5) If a retailer has no prior tax or business fiscal year in Wisconsin, the retailer shall make a good faith estimate of its percentage under Part II.D.4.(a)(2) on page 13 for the retailer's first tax or business fiscal year and shall adjust the estimate prospectively after the first 3 months of the retailer's operations if the actual

percentage is materially different from the estimated percentage.

- (6) For retailers with more than one establishment in Wisconsin, a single determination that combines the information for all of the retailer's establishments in Wisconsin shall be made annually, and will apply to all of the retailer's establishments in Wisconsin.
- (c) (1) If the percentage determined under Part II.D.4.(a)(2) on page 13 is 75% or less, utensils are only considered to be provided by the retailer if the retailer's customary practice is to physically give or hand the utensils to the purchaser, except that in the case of plates, bowls, glasses, or cups that are necessary to receive the food, such items need only be made available to the purchaser.
- (2) If the percentage determined under Part II.D.4.(a)(2) on page 13 is greater than 75% and utensils are made available to the purchaser, all of the retailer's sales of food and food ingredients will be considered sales of prepared food. **Exception:** An item sold by the retailer that contains 4 or more servings packaged as one item and sold for a single price is only prepared food if (1) the retailer physically gives or hands utensils to the purchaser, (2) the retailer makes plates, bowls, glasses, or cups that are necessary for the purchaser to receive the food available to the purchaser, (3) the item is sold heated, or (4) the package contains a utensil placed in it by a person other than the retailer or manufacturer.

Serving sizes are based on the information contained on the label of each item sold, except that, if the item sold has

no label, the serving size is based on the retailer's reasonable determination.

Example: Restaurant operates a restaurant and a small convenience store within the restaurant. Its sales of prepared food are greater than 75% of its total sales of food and food ingredients. Restaurant makes various eating utensils available in its convenience store. Customer enters the convenience store and purchases a single serving container of chocolate milk and a gallon container of 2% milk. The gallon container of 2% milk contains 4 or more servings. Restaurant's customary practice for sales in its convenience store is to not physically give utensils to a customer who purchases containers of milk. Since the milk products purchased are prepackaged, plates, bowls, glasses, or cups are not necessary for the purchaser to receive them. Restaurant's sale of the chocolate milk is a sale of prepared food, since (a) more than 75% of its total sales of food and food ingredients are sales of prepared food, (b) eating utensils are made available to customers, and (c) the container of chocolate milk contains fewer than 4 servings. Restaurant's sale of the gallon of 2% milk is not the sale of prepared food, even though more than 75% of its total sales of food and food ingredients are sales of prepared food and the convenience store makes eating utensils available to customers, because the gallon size container of 2% milk contains 4 or more servings, and plates, bowls, glasses, or cups are not necessary for the purchaser to receive the milk.

The flowchart and related notes on pages 56 to 57 of this publication can be used to help determine if the product being sold is "prepared food" and subject to Wisconsin sales or use tax.

- E. "Soft drink" is defined in [sec. 77.51\(17w\)](#), Wis. Stats., to mean "...a beverage that contains less than 0.5 percent of alcohol and that contains natural or artificial sweeteners. 'Soft drink' does not include a beverage that contains milk or milk products; soy, rice, or similar milk substitutes; or

more than 50 percent vegetable or fruit juice by volume.”

Natural and artificial sweeteners include corn syrup, dextrose, invert sugar, sucrose, fructose, sucralose, saccharin, aspartame, stevia, fruit juice concentrates, molasses, evaporated cane juice, rice syrup, barley malt, honey, maltitol, and agave.

Soft drinks are beverages that are in liquid form and do not include items that are not in liquid form such as powdered fruit drinks, powdered teas, and frozen drink concentrates.

Water and tea that contain sweeteners are soft drinks, unless they contain more than 50% fruit or vegetable juice by volume.

Water and tea that are unsweetened are not soft drinks, even if carbonated or flavored.

III. SALES AND PURCHASES BY GROCERY STORES

A. Sales and Purchases of Inventory Items

Grocers purchase and resell many different types of products. Certain products which are sold are not subject to Wisconsin sales tax, while other products are subject to Wisconsin sales tax. In addition, sales of products which are usually not subject to Wisconsin sales tax (e.g., donuts), are subject to Wisconsin sales tax if the product meets the definition of “prepared food” as described in Part II.D.4. on pages 12 through 14.

The following sections explain the Wisconsin sales and use tax treatment of the sales and purchases of inventory items.

1. Sales of Inventory Items by Grocers

Sales of items described in Part I.D.1. through 4. on page 7 are subject to Wisconsin sales tax, unless a specific exemption applies. There are three common reasons that sales made by grocers may not be subject to Wisconsin sales tax. The reasons are:

- (a) The grocer is selling products which qualify for the exemption for “food and food ingredients” that are for human consumption.
- (b) The grocer is selling products to organizations which are exempt from Wisconsin sales tax (e.g., churches, federal governmental agencies, any federally recognized American Indian tribe or band in Wisconsin, Wisconsin state and local governmental agencies) and the organization provides the grocer with either:
 - (1) A certificate of exemption, indicating the organization’s certificate of exempt status (CES) number (**Note:** In lieu of obtaining a certificate of exemption, the grocer may record the CES number on its copy of the bill of sale), or
 - (2) For federal and Wisconsin (state and local) governmental agencies, which includes public school districts, an exemption certificate indicating the governmental entity’s CES number or a purchase order or similar written document from the governmental agency.
- (c) The grocer is selling products to customers who provide the grocer with an exemption certificate claiming an exemption from Wisconsin sales and use tax (e.g., resale).

Food and Food Ingredients for Human Consumption

Exempt Food and Food Ingredients and Beverages: An exemption from Wisconsin sales and use tax is provided for all “food and food ingredients” except “candy,” “dietary supplements,” “prepared food,” and “soft drinks.” The following examples of food and food ingredients are exempt from Wisconsin sales tax, *provided they do not meet the definition of “candy,” “dietary supplements,” “soft drinks,” or “prepared foods.”*

Apple cider, sweet	Desserts and toppings
Baby food	Dinners, frozen
Bakery goods	Donuts
Baking powder and soda	Dressings
Barbecue sauces	Dried fruits, unsweetened
Berries	Dried milk products
Beverage powders	Eggs
Beverages that contain milk	Fish and fish products
Biscuit mix	Flavoring extracts
Bottled water, unsweetened	Flour
Bouillon cubes	Food coloring
Bread and rolls	Frosting not sold in the form of bars, drops, or pieces
Breakfast pastries	Frozen desserts
Brownies	Frozen fruit juices
Butter	Frozen fruits and vegetables
Cake mixes	Frozen pizza
Cakes, prepared, mixes, and snack-type	Frozen TV dinners
Canned foods	Fruit
Catsup	Fruit juices that contain more than 50% fruit juice by volume
Cereal and cereal products	Garlic
Cheese	Gelatin
Chicken	Granola bars that contain flour
Chip dip	Gravy extracts and mixes
Chips, potato, corn, and similar items	Grits
Chocolate, unsweetened or not sold in form of bars, drops, or pieces	Hash
Citrus fruits	Honey
Cocoa	Ice cream bars and similar products
Coffee beans, grounds, freeze dried, and coffee substitutes	Ice cream in cones
Coffee drinks that contain no sweeteners or that contain a milk or milk product	Ice cubes
Condiments	Jams
Cones and ice cream cups	Jellies
Cookies and crackers	Juices that contain more than 50% fruit or vegetable juice by volume
Cooking oils	Ketchup
Cream	Lobster
Dairy products	Luncheon meats
Deli items	Macaroni

Exempt Food and Food Ingredients and Beverages (cont'd)

Malted milk powder	Rice
Maraschino cherries not including chocolate covered cherries	Rolls and biscuits
Margarine	Salad dressing
Marshmallow creme	Salt and salt substitutes
Marshmallows that contain flour	Salted nuts
Mayonnaise	Sardines
Meal	Seafood
Meat and meat products	Seasonings
Meat extracts and tenderizers	Sherbet
Melons	Shortening
Milk and milk products	Soup
Mustard	Spaghetti products
Noodles	Spices
Nuts	Spreads
Oil, cooking, salad	Sugar
Oleomargarine	Sweeteners
Olives	Syrup
Pancake mix	Tea bags, leaves or instant
Pasta	Tea and ice tea beverages that are not sweetened
Peanuts	Trail mix with candy
Peanut butter	Turkey
Pectins	Vanilla and vanilla extract
Pepper	Vegetable juices that contain more than 50% juice by volume
Pickles	Vegetables
Pie and pie fillings	Vinegar
Pie crust and mixes	Waffle mix
Popcorn, popped or unpopped	Water, carbonated, unsweetened
Popsicles	Water, flavored, unsweetened
Potato chips	Water, unsweetened
Potato salad	Yeast
Poultry and poultry products	Yogurt and yogurt bars, cones, and sundaes
Powdered drink mixes	
Preserves	
Pretzels	
Puddings	
Raisins	
Ravioli	
Relishes	

Taxable Food and Food Ingredients and Beverages: There are many foods, food ingredients, and beverages sold in grocery stores that are subject to Wisconsin sales tax.

The following examples of products (including sales from vending machines) are subject to Wisconsin sales and use tax:

Alcoholic beverages	Dried fruit with sweeteners
Anti-acid products	Fermented malt beverages
Aspirin	Flowers
Baking chips, sweetened	Fruit drinks that contain a sweetener and have 50% or less fruit juice by volume
Baking chocolate in the form of a bar, drop, or piece that contains a sweetener	Fruit snacks that contain a sweetener
Beer	Ginseng sold as a dietary supplement
Beverage powders that are dietary supplements	Granola bars that are sweetened, unless they contain flour
Bottled water, sweetened	Gum
Breath mints	Heated foods and beverages
Cake decorations that are candy	Honey roasted and honey coated nuts
Candied fruits	Ice blocks
Candy	Intoxicating liquor
Candy apples	Juices that contain sweeteners and 50% or less fruit or vegetable juice by volume
Caramel apples	Lozenges
Caramel corn	Marshmallows
Chewing gum	Nuts that are candy, such as honey roasted cashews
Chocolate chips and other flavored chips, if sweetened	Peanuts that are candy, such as honey roasted peanuts
Chocolate covered raisins and nuts	Popcorn that is candy, such as caramel corn
Cocktail mixes containing 50% or less fruit or vegetable juice	Potato salad that is prepared food
Cod liver oil	Powdered drink mixes that are dietary supplements
Coffee drinks that contain sweeteners, unless it also contains milk or a milk product	
Confections that are candy	
Cough drops	
Deli items that are prepared food	
Dietary supplements	
Distilled spirits	

Taxable Food and Food Ingredients and Beverages (cont'd)

Prepared foods	Taffy apples
Pretzels that are prepared food	Tea drinks that contain sweeteners
Raisins that are candy, such as yogurt coated raisins	Tonics
Root beer	Vegetable juice that contains a sweetener and 50% or less juice by volume
Salted nuts that are candy	Vitamins
Sandwiches that are prepared food	Water, sweetened
Seeds for planting	Yogurt covered raisins and nuts
Soft drinks	

Prepackaged Food Combinations

If a combination of taxable and nontaxable products that are distinct and identifiable, one or more of which is a food or food ingredient, are packaged together and:

- (1) More than 50% of the retailer's purchase price or sales price as determined by the seller (but not a combination of both) of the products in the package are attributable to products that are subject to Wisconsin sales or use tax, the total sales price of the package is subject to Wisconsin sales or use tax.
- (2) 50% or less of the retailer's purchase price or sales price as determined by the seller (but not a combination of both) is attributable to products that are subject to Wisconsin sales or use tax, the total sales price of the package is exempt from Wisconsin sales or use tax.

Example: A grocery store sells a package that contains crackers, meat, cheese, candy, and a soft drink. The grocery store purchased the package from Company. Of the grocery store's purchase price and selling price, 75% is attributable to the meat, cheese, and crackers (exempt products) and 25% is attributable to the candy and soft drink (taxable products). Since neither the retailer's purchase price nor selling price of the

taxable products is greater than 50% of the retailer's purchase price or sales price of products that are subject to Wisconsin sales or use tax, the entire sales price of the package is exempt from Wisconsin sales or use tax.

Fruit and Vegetable Juices and Drinks, Soft Drinks, Beer, Wine, and Liquor Sales

Fruit and Vegetable Juices and Drinks Exempt From Sales Tax: Sales of fruit and vegetable juices and drinks that contain more than 50% fruit or vegetable juice by volume, are exempt from Wisconsin sales tax. In addition, powders and frozen concentrates used to make fruit and vegetable juices or drinks are exempt from Wisconsin sales or use tax since they are not in liquid form and therefore do not meet the definition of "soft drink."

Fruit and Vegetable Juices and Drinks Subject to Wisconsin Sales Tax: Sales of fruit and vegetable juices and drinks which are not more than 50% fruit or vegetable juice by volume are subject to Wisconsin sales tax, unless they contain milk or milk products or soy, rice, or similar milk substitutes.

Soft Drinks: Sales of beverages that contain less than 0.5% alcohol by volume and which contain a natural or artificial sweetener are subject to Wisconsin sales or use tax. To be considered a beverage, the product must be sold in liquid form. However, if the beverage contains milk or milk products, soy, rice, or similar milk substitutes, or more than 50% vegetable or fruit juice by volume, it is not subject to Wisconsin sales or use tax as a soft drink. It may, however, be subject to Wisconsin sales or use tax if it meets the definition of prepared food or dietary supplement.

Beer, Wine, and Liquor Sales: Sales of beer, wine, and liquor are subject to Wisconsin sales and use tax as sales of alcoholic beverages if they are suitable for human consumption and contain 0.5% or more alcohol by volume. However, "cooking wines" are exempt from

Wisconsin sales or use tax. **Note:** Non-alcoholic beers may be taxable as soft drinks if they contain a sweetener.

What about sales of other items?

For specific information about sales of other foods and food ingredients, and beverages sold by grocery stores, see the following sections of this publication:

- "Bakery Sales and Purchases" on page 20,
- "Catering Sales and Purchases" on page 26,
- "Deli Sales and Purchases" on page 28,
- "Meat Department Sales and Purchases" on page 35, and
- "Vending Machine Sales and Purchases" on page 39.

Taxable Sales of Non-Food Items

A grocer's sales of non-food items (except as provided in the following section titled "Exempt Sales of Non-Food Items"), are subject to Wisconsin sales tax, unless the customer can claim an exemption (e.g., nonprofit, government, resale). Examples of non-food items sold by grocers that are subject to tax include, but are not limited to:

- Appliances, bakeware, and utensils, such as can openers, clocks, pots and pans, spoons, forks, and knives
- Auto supplies, such as oil, anti-freeze, cleaners, lubricants, and light bulbs
- Baby care supplies, such as diapers, wipes, pacifiers, bottles, and rattles
- Beauty supplies, such as make-up, hair spray, nails, nail polish, perfume, bobby pins, rollers, and jewelry
- Cameras, film, and other photography supplies
- Canning and freezing supplies, such as jars, lids, wrapping paper, and tape
- Cigars, cigarettes, tobacco, and lighters
- Cleaning supplies, such as wax, polishes, mops, brooms, pails, sponges, gloves, soap, laundry detergent, bleach, ammonia, bowl and drain cleaners, and air fresheners

- Electrical supplies, such as flashlights, bulbs, batteries, and fuses
- Garbage cans, bags, and wastebaskets
- Greeting cards, gifts, and wrapping paper
- Grilling supplies, such as charcoal, charcoal starter, rotisseries, and matches
- Grocery bags (disposable or reusable)
- Hardware supplies, such as nails, screws, nuts, bolts, paint and paint supplies, steel wool, and sandpaper
- Hygiene products, such as soap, shampoo, combs, deodorant, shaving cream, and razors
- Lawn and garden supplies, such as tools, hoses, fertilizers, flowers, seeds, and insect and pest control products
- Medical supplies and first aid products, such as aspirin, band-aids, cough drops, rubbing alcohol, ointments, and suntan lotion
- Music and video supplies, such as records, tapes, CD's, and head cleaners
- Office and school supplies, such as pens, pencils, crayons, note pads, binders, stationery, tape, glue, rubber bands, scissors, paper clips, staples, and staplers
- Paper and plastic products, such as napkins, paper towels, paper plates, and plastic utensils
- Pet food and supplies, such as collars, flea and tick spray, dog biscuits, and pet toys
- Reading materials such as books, magazines, and periodicals (newspapers are exempt from Wisconsin sales tax)
- Toiletries such as toilet paper, facial tissue, bubble bath, toothbrushes, and feminine hygiene products
- Toys and games, such as balls, board games, and dolls
- Water softener salt and conditioners

- Wearing apparel, linens, clothing, gloves, washcloths, hosiery, zippers, sewing supplies, thread, shoelaces and polish, sun-sunglasses, stockings, and watches

Exempt Sales of Non-Food Items

A grocer's sales of non-food items which are exempt from Wisconsin sales tax and for which an exemption certificate is not needed include, but are not limited to:

- Newspapers
- Fuel for motor vehicles subject to tax under Chapter 78, Wis. Stats.
- Prescription drugs
- Durable medical equipment for home use
- Mobility-enhancing equipment
- Prosthetic devices
- United States and Wisconsin flags

2. Purchases of Inventory Items by Grocers

A grocer's purchases of items which are going to be resold may be made without Wisconsin sales and use tax. The grocer may be required to provide its supplier with an exemption certificate claiming resale.

Exemption Certificate Not Required - Items that qualify for the exemption for food and food ingredients for human consumption may be purchased by the grocer without Wisconsin sales and use tax and without issuing an exemption certificate. The listing on page 16 (*Exempt Food and Food Ingredients and Beverages*) shows examples of these items.

Exemption Certificate Required - Certain foods and food ingredients, and non-food items which a grocer purchases and resells, may be purchased without Wisconsin sales and use tax if the grocer provides the supplier with an exemption certificate claiming resale. The listing on page 17 (*Taxable Food and Food Ingredients and Beverages*) shows examples of these items. (**Note:** The products identified in the section titled "Exempt Sales of Non-

Food Items” may be purchased without tax and without the issuance of an exemption certificate claiming resale.)

B. Bakery Sales and Purchases

1. Sales by Bakeries

The taxability of bread, cakes, cookies, donuts, rolls, and other foods commonly made by bakeries and sold by the bakery or in grocery stores depends on whether the items are sold “heated” or otherwise meet the definition of prepared food or candy as defined in Part II. on pages 8 through 15. See Table 1 on page 21. Table 1 applies to sales of bakery items by a bakery or a grocery store regardless of whether the bakery or grocery store made the bakery items or purchased the bakery items already made from a third party.

Note: In order to determine the proper Wisconsin sales and use tax treatment of the sale of bakery items using Table 1, you must start at Question 1 in the table and stop at the first description that accurately describes the transaction in question and indicates “Taxable” or “Not Taxable.”

Table 1 assumes the following:

- The item being sold is a food or food ingredient that does **not** meet the definition of candy, dietary supplement, or soft drink as explained in Part II.A., B., and E. on pages 8 to 9 and 14 to 15.
- The retailer’s North American Industry Classification System (NAICS) code is not manufacturing under subsector 311, except for bakeries and tortilla manufacturing under industry group 3118.
- The package does not contain a utensil placed in it by a person other than the retailer.
- The item is not a product that is only sliced, repackaged, or pasteurized by the grocery store.
- The product does not contain meat, fish, poultry, or any food containing them in raw form that requires further cooking by the consumer to prevent food-borne illnesses.

For sales of food and food ingredients that are not covered by Table 1, see Appendix I.

Table 1		
Retail Sales of Bakery Products by Grocery Stores		
Instructions: Start at question 1 and work your way down this table. Stop when you get to the first “taxable” or “not taxable” answer that applies. See assumptions on previous page.		
1. Is the bakery product sold heated?¹	Yes→	Taxable
No ↓		
2. Is the grocer’s customary practice to physically give or hand a utensil to the customer?^{2,3}	Yes→	Taxable
No ↓		
3. Are plates, bowls, glasses, or cups necessary to receive the bakery product made available to the customer?	Yes→	Taxable
No ↓		
4. Are utensils made available by the retailer to the purchaser?^{2,4}	No→	Not Taxable
Yes ↓		
5. Are there 4 or more servings packaged as one item and sold for a single price?⁵	Yes→	Not Taxable
No ↓		
6. Are grocer’s sales of prepared food 75% or less?⁶	Yes→	Not Taxable
	No→	Taxable

Notes to Table 1:

1. “Sold heated,” as used in Table 1, means sold at a temperature higher than the air temperature of the room or place where the products are sold.
2. “Utensils” includes plates, bowls, knives, forks, spoons, glasses, cups, napkins, and straws.
3. If the grocer’s customary practice is to physically give or hand the utensil to the customer, the sale by the grocer is a sale of prepared food even if the customer does not receive the utensil.
4. Utensils are “made available” to the customer if the customer can select a utensil at their own discretion, rather than having the retailer physically hand or give the customer a utensil.
5. For purposes of determining if 4 or more servings are packaged together for sale as a single item, the serving size is based on the label of each of the items sold and if there is no label, the serving size is based on the retailer’s reasonable determination.
6. To determine if the retailer’s sales of prepared foods are more than 75% of its sales of foods and food ingredients, see Part II.D.4.(b) on pages 13 to 14.

The following examples illustrate how to determine whether an item is “prepared food.” All of the answers presume that the item is not subject to tax as candy, a dietary supplement, or a soft drink.

Example 1 - Donut “To Go” – Not Prepared Food: Bakery sells one donut “to go” for \$0.75 to Customer. Bakery’s sales of prepared food, as determined in Part II.D.4.(b) on pages 13 to 14, are 75% or less of all of its sales of food and food ingredients. Bakery’s customary practice when it sells donuts “to go” is to sell the donuts without physically giving or handing napkins or other utensils to the customer. Plates, bowls, glasses, or cups are not necessary for the customer to receive the donut. Although the donut was made by Bakery, it does not meet the definition of prepared food provided in Part II.D. on pages 10 through 14, because (1) it is not sold heated, (2) Bakery’s customary practice is not to physically give or hand utensils to its customers with donuts that are sold “to go,” (3) plates, bowls, glasses, or cups are not necessary for the customer to receive the donut; and (4) Bakery’s sales of prepared food, as determined in Part II.D.4.(b) on pages 13 to 14, are 75% or less of all of its sales of food and food ingredients. Since the donut does not meet the definition of prepared food, the sale of the donut is not subject to Wisconsin sales or use tax, regardless of whether Bakery makes utensils available to its customers.

Example 2 - Donut and Coffee “To Go”: Same as *Example 1*, except that Bakery also sells a hot cup of coffee for \$1.00 to Customer along with the donut. The sale of the donut is not subject to tax as explained in *Example 1*. The hot coffee is prepared food and the sale of it is subject to Wisconsin sales or use tax.

Example 3 - Donut and Coffee Eaten at Bakery – Prepared Food: Same as *Example 1*, except that the donut is sold to be eaten at the bakery. Bakery’s customary

practice when selling donuts to be eaten at its bakery is to physically give or hand its customers a napkin along with the donuts purchased. The sale of the donut and hot coffee are subject to Wisconsin sales or use tax because they meet the definition of prepared food. The coffee meets the definition of prepared food because it is sold heated. The donut meets the definition of prepared food, because Bakery’s customary practice when it sells donuts to be eaten at the bakery is to physically give or hand its customer a napkin or other utensil along with the donut.

Example 4 - Donut “To Go” - Prepared Food: Bakery sells one donut “to go” for \$0.75 to Customer. Bakery’s sales of prepared food, as determined in Part II.D.4.(b) on pages 13 to 14, are 75% or less of all of its sales of food and food ingredients. Bakery’s customary practice when it sells donuts “to go” is to physically give or hand napkins or other utensils to its customers with the donuts. Plates, bowls, glasses, or cups are not necessary for the customer to receive the donut. Since Bakery’s customary practice when it sells donuts “to go” is to hand its customers napkins along with the donuts, Bakery’s sale of the donut to Customer is the sale of prepared food and subject to Wisconsin sales or use tax. The sale to Customer is subject to tax even if Customer does not receive a napkin along with the donut, since Bakery’s customary practice when it sells donuts “to go” is to physically give or hand its customers napkins or other utensils.

Example 5 - Donut and Coffee Eaten at Bakery: Same as *Example 4*, except that the donut is sold to be eaten at the bakery and Bakery sells a cup of hot coffee for \$1.00 to Customer along with the donut. Bakery’s customary practice when selling donuts to be eaten at its bakery is to sell the donuts to its customers without physically giving or handing them napkins or other utensils along with the donuts purchased. However, napkins and other utensils are made available to customers. The hot coffee is prepared food and the sale of it is subject to Wisconsin

sales or use tax. The sale of the donut is not subject to Wisconsin sales or use tax since it does not meet the definition of prepared food provided in Part II.D. on pages 10 through 14, because (1) it is not sold heated, (2) Bakery's customary practice is not to physically give or hand utensils to its customers who purchase the donut sold to be eaten at the bakery, (3) plates, bowls, glasses, or cups are not necessary for the customer to receive the donut; and (4) Bakery's sales of prepared food, as determined in Part II.D.4.(b) on pages 13 to 14, are 75% or less of all of its sales of food and food ingredients.

Example 6 - Donut and Carton of Milk - Prepared Food: Bakery sells one donut (single serving) for \$0.75 and a carton of milk (single serving) for \$.50 to Customer "to go." Bakery's sales of prepared food, as determined in Part II.D.4.(b) on pages 13 to 14, are **more than 75%** of all of its sales of food and food ingredients. Bakery's customary practice when it sells donuts and cartons of milk "to go" is to sell the donuts and milk to its customers without physically giving or handing them napkins or other utensils. However, napkins and other utensils are made available to customers. Plates, bowls, glasses, or cups are not necessary for the customer to receive the donut or milk. The sale of the donut as well as the sale of the carton of milk are subject to tax as sales of prepared food because (a) Bakery's sales of prepared foods, as determined in Part II.D.4.(b) on pages 13 to 14, are more than 75% of all of its sales of food and food ingredients and (b) Bakery makes utensils available to its customers.

2. Purchases by Bakeries

Machinery and Equipment - Bakeries are considered to be manufacturers for Wisconsin sales and use tax purposes and, therefore, may purchase certain machinery and equipment without Wisconsin sales and use tax. The machinery and equipment must be used

exclusively and directly in the manufacturing process to qualify for the exemption from Wisconsin sales and use tax. For such exempt items, the bakery should provide the supplier with either the *Wisconsin Sales and Use Tax Exemption Certificate* ([Form S-211](#)) or another exemption certificate claiming the appropriate manufacturing-related exemption.

Example - Purchases of Equipment Used in Manufacturing Process: Bakery purchases a mixer which will be used exclusively and directly in manufacturing donuts. Bakery must provide the supplier with an exemption certificate ([Form S-211](#)) or another exemption certificate claiming the appropriate manufacturing-related exemption to purchase the mixer without Wisconsin sales and use tax.

The manufacturing process of a bakery begins with the removal of the ingredients from storage *and* generally ends with the removal of the baked products from the pans or receptacles. However, the manufacturing process also includes the packaging of the baked goods in bags, boxes, etc., if the baked goods have not been stored or displayed prior to packaging them.

Example 1 - Packaging Not Part of Manufacturing Process: Bakery manufactures donuts. Once the donuts are manufactured, they are placed in a display case where customers choose which donuts they would like to purchase. As the donuts are selected, they are placed in a box. The packaging of the donuts, as described above, is not part of the manufacturing process. As a result, the machinery and equipment used to package the donuts does not qualify for the manufacturing exemption. However, the packaging materials themselves (e.g., boxes, bags) are exempt from Wisconsin sales and use tax

because they are used to transfer the donuts to the customer.

Example 2 - Packaging Part of Manufacturing Process: Bakery manufactures bread. Once the bread is removed from the oven, it is placed on a tray to cool. After the bread is cooled, equipment is used to package the bread into a bag. The equipment is used exclusively to package the bread prior to being stored or displayed for sale. The packaged bread is then displayed for sale to customers. The packaging equipment, if used as described above, qualifies for the exemption for machinery and equipment used exclusively and directly in the manufacturing process.

Common Items Which Qualify for Exemption: Examples of items which may be purchased by a bakery without Wisconsin sales and use tax **if used exclusively and directly in manufacturing** include:

- Bread pans, pie pans, and other pans for baking
- Bread slicers, cookie cutters, and glazing screens
- Scales used to weigh dough
- Rolling pins, scoops, measuring cups, and can openers
- Ovens, mixers, gas fryers, and donut machines
- Thermometers used to check the temperature of dough
- Wearing apparel used by employees to prevent contamination of the manufactured product (e.g., gloves worn by an employee making donuts which are worn to prevent the donuts from being contaminated during the manufacturing process qualify for this exemption)
- Cleansers and solvents used for cleaning manufacturing machinery

Common Items Which Do Not Qualify for Exemption: Examples of items which are not considered to be used directly in the manufacturing process and are subject to Wisconsin sales and use tax include:

- Pot and pan washers and sinks
- Display equipment, including display pans
- Delivery carts and racks used in delivering bakery products to customers if the carts and racks are not transferred to customers
- Wearing apparel for the comfort or welfare of employees or for the protection of employees clothing (e.g., an apron worn by an employee to prevent the employee's clothing from being damaged does not qualify for this exemption)
- Cleansers, chemicals, and cleaning agents used to clean the walls, ceilings, floors, drains, windows, and doors where the manufacturing takes place

Food and Food Ingredients: Ingredients used to produce baked goods which are sold may be purchased without paying Wisconsin sales and use tax. If the ingredients qualify for the exemption for food and food ingredients for human consumption, the bakery does not need to provide the supplier with an exemption certificate. Part III.A.1. on pages 15 and 16 (*Exempt Food and Food Ingredients and Beverages*) of this publication contains additional information on types of items which qualify for the exemption for food and food ingredients for human consumption. If the ingredients do not qualify for the exemption for food and food ingredients for human consumption, the grocer must provide the supplier with an exemption certificate claiming resale or other appropriate exemption to purchase them without Wisconsin sales and use tax.

Example 1 - Purchases of Food and Food Ingredients for Manufactured Items - No Exemption Certificate Needed: Bakery purchases flour and eggs which will be used to make cakes. Since flour and eggs are exempt food or food ingredients for human consumption, Bakery may purchase these items without Wisconsin sales and use tax. Bakery is not required to provide the supplier of the flour and eggs with an exemption certificate.

Example 2 - Purchases of Food and Food Ingredients for Manufactured Items - Exemption Certificate Is Needed: Bakery purchases candy which will be used to make cakes the bakery will sell. Since candy is not an exempt food or food ingredient for human consumption, Bakery may only purchase these items without Wisconsin sales and use tax if Bakery provides the supplier of the candy with a fully completed exemption certificate.

Containers and Packaging Materials: A bakery's purchases of containers and other packaging materials which are used to transfer bakery goods to customers are not subject to Wisconsin sales and use tax. The containers may or may not be returnable. To claim this exemption, the bakery must provide the supplier with either the *Wisconsin Sales and Use Tax Exemption Certificate (Form S-211)*, or another fully completed exemption certificate claiming the appropriate exemption.

Examples of items which qualify for this exemption when used to transfer the baked goods to customers include:

- Boxes or cartons used to package donuts
- Bags used to package bread
- Dividers used to separate food sections within a container
- Paper used to line containers

- Tape and rubber bands used to keep containers closed
- Disposable cups used to transfer beverages sold to customers

Examples of items which **do not qualify** for the exemption for containers and packaging and shipping materials include:

- Wrapping equipment such as tape dispensers, paper holders, and staplers (assuming these items are not used directly and exclusively in the manufacturing process as discussed previously)
- Price tags
- Bakery delivery carts used to deliver bakery goods to customers if the bakery delivery carts are not physically transferred to customers

Other Items Being Resold: If the item being purchased does not qualify as a food or food ingredient for human consumption (e.g., non-food cake decorations), but is being resold by the bakery, the bakery must provide the supplier with an exemption certificate claiming resale to purchase these types of items without Wisconsin sales and use tax. See Part III.A.1. on pages 16 and 17 (*Taxable Food and Food Ingredients and Beverages*) for additional information on these types of purchases.

Example - Purchases of Cake Decorations for Resale: Bakery purchases non-food cake decorations from Supplier which will be resold to Bakery's customers as a part of a cake. Bakery must provide Supplier with an exemption certificate claiming resale to purchase the decorations without Wisconsin sales and use tax.

Items Not Being Resold: If a bakery purchases reusable items, other than containers used to transfer merchandise to customers, which are not being resold to and kept by

customers, but instead are returned to the bakery and reused, the bakery is considered to be the consumer of these types of items. Purchases by the bakery of these types of items are subject to Wisconsin sales and use tax.

Example - Purchases of Reusable Cake Decorations: Bakery purchases reusable cake decorations from Supplier. Bakery's customers are required to return the decorations to Bakery after the cake is eaten. Bakery does not charge its customers for use of the decorations. Bakery is considered to be the consumer of the reusable decorations and must pay Wisconsin sales or use tax on its purchases of the decorations.

C. Catering Sales and Purchases

1. Sales by Caterers

Food and food ingredients that are sold as prepared food, candy, soft drinks, or dietary supplements by caterers are subject to Wisconsin sales tax. A caterer's sales of alcoholic beverages are also subject to Wisconsin sales and use tax.

"Caterer," as used in this publication, means a business engaged in the selling and serving of prepared food, candy, soft drinks, dietary supplements, and alcoholic beverages on premises designated by a purchaser.

Charges by a caterer for preparing, serving, and delivering prepared foods, candy, soft drinks, dietary supplements, and alcoholic beverages are subject to Wisconsin sales tax.

The method a caterer uses to bill a customer for the meals does not affect the taxability of the charge (e.g., price per plate, price per meal, lump sum, price per type of service).

Example 1 - Price Per Service: Caterer agrees to prepare, deliver, and serve prepared food for Customer at a wedding dinner and reception. Caterer bills Customer \$200 for preparing the food, \$50

for transporting the food to the location of the dinner and reception, and \$300 for serving the food to the guests. The entire \$550 charge is subject to Wisconsin sales tax.

Example 2 - Price Per Meal: The catering department of Grocer is hired to provide a meal for 200 people at Company. The meal consists of prepared foods and soft drinks. Grocer charges Company \$15 per meal plus a \$3 per meal gratuity. The entire \$3,600 charged by Grocer to Company is subject to Wisconsin sales tax.

Example 3 - Lump Sum: Caterer agrees to provide, prepare, and serve enough prepared food and beverages, including soft drinks and alcoholic beverages for 200 people for a fee of \$5,000. The entire \$5,000 charge is subject to Wisconsin sales tax.

Example 4 - Chef and Bartender Services: Customer hires a chef to prepare food for an event. Customer also hires a bartender to prepare and serve alcoholic beverages and soft drinks at the event. Customer purchases the food and food ingredients needed by the chef, all of which are exempt food and food ingredients. Customer also purchases all of the alcoholic beverages and soft drinks. The chef's charges to Customer for the service of preparing the food and food ingredients are not subject to Wisconsin sales or use tax since the services are performed on exempt food and food ingredients. The charges by the bartender for preparing and serving the alcoholic beverages and soft drinks are subject to Wisconsin sales or use tax.

2. Purchases by Caterers

Food and Food Ingredients

Items Which May Be Purchased Without Sales and Use Tax and Without Issuing an Exemption Certificate - Certain food and food ingredients a caterer purchases and resells may be purchased without Wisconsin sales and use tax because the items qualify for the exemption for food and food ingredients for human consumption. Examples of such items are cake mixes, meats, vegetables, and milk. See Part III.A.1. on pages 15 and 16 (*Exempt Food and Food Ingredients and Beverages*) for additional information on these types of items.

A caterer is not required to provide the supplier of these types of items with an exemption certificate to purchase them without Wisconsin sales and use tax.

Items For Which an Exemption Certificate Must Be Issued To Purchase Them Without Sales and Use Tax - Certain food and food ingredients which a caterer purchases and resells may only be purchased without Wisconsin sales and use tax if the caterer provides the supplier with an exemption certificate claiming resale. Examples of such items are beer, soft drinks, and candy. See Part III.A.1. on pages 16 and 17 (*Taxable Food and Food Ingredients and Beverages*) for additional information on these types of items.

Preparation and Serving Equipment

Non-Disposable Items - Purchases of items used by caterers to prepare, transport, and serve food and food ingredients and beverages to their customers are subject to Wisconsin sales and use tax. Examples of such items include dishes, glasses, silverware, tablecloths, linen napkins, and pots and pans. However, if the customer is given the option of whether or not to have the caterer provide the dishes, glasses, silverware, tablecloths, linen napkins, etc., and a sepa-

rate and optional charge is made by the caterer for those customers who choose to have the caterer provide these items (i.e., the caterer is leasing or renting the items to the customer), the caterer may purchase these items without tax for resale if the caterer is using them solely for lease or rental purposes. **Note:** Packaging and shipping materials for use in packing, packaging, or shipping meat or meat products are exempt from Wisconsin sales and use taxes.

Disposable Items - Purchases by caterers of disposable items which are resold to customers along with the caterer's sales of prepared food, food ingredients, and beverages are not subject to Wisconsin sales or use tax. A caterer is reselling the disposable items if the disposable items are provided to the customer with the required purchase of taxable products, even if the caterer does not charge the customer for the disposable items. If the caterer is reselling the disposable items, the caterer must provide the supplier of these items with an exemption certificate claiming resale to purchase them without Wisconsin sales and use tax. Examples of disposable items include plastic or paper cups and plates, plastic eating utensils, paper napkins, straws, disposable place mats, and toothpicks.

Example 1: Customer hires Grocer to prepare, sell, and serve prepared food for \$1,000. As part of the catering service, Grocer also furnishes paper plates and plastic cups, forks, and knives. Grocer will not reduce its charge if customer does not want the paper plates and plastic forks, cups, and knives. Grocer's \$1,000 charge for the preparing, selling, and serving of the prepared food is subject to Wisconsin sales or use tax. Grocer may purchase the paper plates and plastic forks, cups, and knives without tax for resale.

Note: For sales between October 1, 2009 and August 31, 2011, Grocer was

required to pay tax on its purchase of the paper plates and plastic forks, cups, and knives that it provided to its customers for free (i.e., the price did not vary depending on whether the customer received the disposable items).

Example 2: Customer hires Grocer to prepare, sell, and serve prepared food for \$1,000. Grocer gives Customer the option of either (1) providing her own plates, cups, napkins, and utensils, or (2) having Grocer provide disposable plates, cups, napkins, and utensils for an additional \$50 charge. Customer chooses to have Grocer provide the disposable plates, cups, napkins, and utensils. Grocer’s \$1,050 charge to Customer for the preparing, selling, and serving of the prepared food and the sale of the disposable plates, cups, napkins, and utensils is subject to Wisconsin sales or use tax. Grocer may purchase the disposable plates, cups, napkins, and utensils without tax for resale because Grocer is selling them to Customer.

D. Deli Sales and Purchases

1. Sales by Delis

The taxability of sales of food and food ingredients and beverages for human consumption by a deli depends on whether the items are sold “heated,” or otherwise meet the definition of prepared food, candy,

soft drink, or dietary supplement, as explained on pages 8 to 15. Table 2 below may be used to determine if an item being sold by the deli is subject to Wisconsin sales tax.

Note: In order to determine the proper Wisconsin sales and use tax treatment of the sale of deli items using Table 2, you must start at question 1 in the table and stop at the first description that accurately describes the transaction in question and indicates “Taxable” or “Not Taxable.”

Table 2 assumes the following:

- The item being sold is not a bakery item. See Table 1 in Part III.B.1. on page 21 titled “Retail Sales of Bakery Products by Grocery Stores” for the proper Wisconsin sales and use tax treatment of bakery items.
- The item being sold is a food or food ingredient that does **not** meet the definition of candy, dietary supplement, or soft drink as explained in Part II.A., B., and E. on pages 8 to 9 and 14 to 15.
- The retailer’s North American Industry Classification System (NAICS) code is not manufacturing under subsector 311, except for bakeries and tortilla manufacturing under industry group 3118.
- The package does not contain a utensil placed in it by a person other than the retailer.

Table 2		
Retail Sales of Deli Products by Grocery Stores		
Instructions: Start at question 1 and work your way down this table. Stop when you get to the first “taxable” or “not taxable” answer that applies. See assumptions on previous page.		
1. Is the product sold heated?¹	Yes→	Taxable
No ↓		
2. Is the grocer’s customary practice to physically give or hand a utensil to the customer?^{2,3}	Yes→	Taxable
No ↓		
3. Are plates, bowls, glasses, or cups necessary to receive the product made available to the customer?	Yes→	Taxable
No ↓		
4. Were the food or food ingredients previously heated by the retailer but sold in an unheated state?	Yes→	Go to Question 9
No ↓		
5. Were 2 or more ingredients mixed or combined by the retailer for sale as a single item?	No→	Go to Question 10
Yes ↓		
6. Is the product sold by weight or volume?⁴	Yes→	Go to Question 10
No ↓		
7. Is the product only sliced, repackaged, or pasteurized by the retailer?	Yes→	Go to Question 10
No ↓		
8. Is the product meat, fish, egg, or poultry or any food containing them in raw form that requires cooking by the consumer?	Yes→	Go to Question 10
	No→	Taxable
9. Were 2 or more ingredients mixed or combined by the retailer for sale as a single item and sold by weight or volume?⁴	No→	Taxable
Yes ↓		

10. Are the grocer's sales of prepared food greater than 75%? ⁵	No→	Not Taxable
Yes ↓		
11. Does the product contain 4 or more servings packaged as one item and sold for a single price? ⁶	Yes→	Not Taxable
No ↓		
12. Are utensils made available by the retailer to the purchaser? ⁷	Yes→	Taxable
	No→	Not Taxable

Notes to Table 2:

1. "Sold heated," as used in Table 2, means those foods which are sold at a temperature higher than the air temperature of the room or place where they are sold.
2. "Utensils" includes plates, bowls, knives, forks, spoons, glasses, cups, napkins, and straws.
3. If the grocer's customary practice is to physically give or hand the utensil to the customer, the sale by the grocer is subject to tax even though the customer may not receive the utensil.
4. "Sold by weight or volume" is explained in Part II.D.2.(c) on page 11. Examples are provided.
5. To determine if the retailer's sales of prepared foods are more than 75% of its sales of foods and food ingredients, see Part II.D.4.(b) on pages 13 to 14.
6. For purposes of determining if 4 or more servings are packaged together for sale as a single item, the serving size is based on the label of each of the items sold and if there is no label, the serving size is based on the retailer's reasonable determination.
7. Utensils are "made available" to the customer if the customer can select a utensil at their own discretion, rather than having the retailer physically hand or give them the utensil.

Examples of Deli Sales

The following examples illustrate when an item sold by a deli is or is not "prepared food" and all of the answers presume that the item is not subject to tax as candy, dietary supplements, or soft drinks.

For each of the following examples, the following assumptions apply, unless explicitly stated otherwise:

- The package that contains the food does not contain a utensil placed in it by a person other than the retailer.
- The retailer's sales of prepared foods is less than 75% of its sales of all food and food ingredients as explained in Part II.D.4.(b) on pages 13 to 14.
- The meat, fish, egg, or poultry included does not require any further cooking by the consumer.

Example 1 - Potato Salad, Unheated Ham, Cheese, and Fruit Salad Sold by Weight:

Deli sells potato salad (\$1.29/lb.), unheated ham (\$2.29/lb.), cheese (\$1.89/lb.), and fruit salad (\$1.19/lb.). Customer purchases one pound of each of these items. Deli's customary practice when it sells these items by the pound is to not physically give or hand a napkin or other utensil to its customer. The sale of these items is not subject to Wisconsin sales tax because the items are sold unheated by weight or volume, the retailer does not hand utensils to the cus-

tomers, and plates, glasses, bowls, or cups are not necessary to receive the items.

Example 2 - Potato Salad, Unheated Ham, Cheese, and Fruit Salad Sold as a Single Item: Deli prepares and sells a serving of potato salad, unheated ham, cheese, and fruit salad as a single serving size meal for \$3.29. The unheated ham does not require further cooking by the consumer. Deli places each of the items in a clam shell container for Customer. The sale of the single serving size meal is subject to Wisconsin sales tax since it is prepared food. The single serving size meal is prepared food since it is made up of two or more ingredients that are mixed or combined by the retailer for sale as a single item and it is not: (a) sold unheated by weight or volume, (b) a bakery item, or (c) only sliced, repackaged, or pasteurized by the retailer. In addition, it does not require further cooking by the consumer to prevent food-borne illnesses.

Example 3 - Heated Chicken: Deli sells chickens roasted on a rotisserie. Customers purchase the roasted chickens by the pound while the chickens are still heated. The sale of a heated chicken is subject to Wisconsin sales tax since it is a prepared food. It meets the definition of prepared food because it is sold heated.

Example 4 - Sales from Self-Service Salad Bar: Customer makes selections from Deli's salad bar and puts them into a clam shell container made available by Deli to its customers. The clam shell container is necessary for Customer to receive the foods and food ingredients. The sale of the salad is subject to Wisconsin sales or use tax since it is the sale of prepared food. It meets the definition of prepared food because plates, glasses, bowls, or cups are necessary for Customer to receive the food and the plates, glasses, bowls, or cups are made available by Deli.

Example 5 - Sales from Food Bar: Customer makes selections from Deli's food bar and puts them into a container supplied by Deli. Deli's customary practice when it sells these items is to not physically give or hand a napkin or other utensil to its customer. The items selected by Customer include heated meats, potatoes, vegetables, and soup. Customer also selects a sealed carton of cold milk. The sale of the heated items to Customer is subject to Wisconsin sales tax as the sale of prepared food. These items are prepared food because they are sold heated and also because a plate, bowl, or cup is necessary for Customer to receive them. The sale of the sealed carton of milk to Customer is not subject to Wisconsin sales or use tax since the milk is not prepared food. The sealed carton of cold milk is not prepared food because (a) the carton of milk is not sold heated, (b) Deli's customary practice is not to hand a napkin, straw or other utensil to the purchaser of the carton of milk, and (c) cups are not necessary to receive the milk. **Note:** If the milk is sold from a dispenser and a cup is necessary for Customer to receive the milk, the sale of the milk is taxable as a sale of prepared food.

Example 6 - Sales of Sandwiches Made by Deli: Deli prepares and sells cold sandwiches. The sandwiches are ready to eat when packaged and are sold for \$3 each. The sandwiches prepared by Deli are prepared food because they are made up of two or more ingredients mixed or combined by the retailer (i.e., Deli) for sale as a single item and are not: (a) sold unheated by weight or volume, (b) a bakery item, and (c) only sliced, repackaged, or pasteurized by the retailer. In addition, the sandwiches do not contain eggs, fish, meat, or poultry or any food containing any of them in raw form that requires further cooking by the consumer to prevent food-borne illnesses.

Example 7 - Sales of Sandwiches Made by Deli and Sold by the Pound: Deli prepares and sells cold sandwiches. The sandwiches are made up of 2 or more ingredients mixed or combined by the retailer and sold as a single item. The cold sandwiches are also ready to eat when they are packaged and sold for \$4 per pound. Deli's customary practice when selling the cold sandwiches is to not physically give or hand napkins or other utensils to customers that purchase the sandwiches. In addition, plates or bowls are not necessary for the customers to receive the sandwiches. Although the cold sandwiches are made up of 2 or more ingredients mixed or combined by the retailer for sale as a single item, the cold sandwiches sold by Deli are not prepared food since they are sold unheated by weight.

Example 8 - Sales of Cheese and Meat Trays: Deli sells meat and cheese trays. Deli prepares the meat and cheese trays by slicing various types of meats and cheeses and placing them on a platter. The meat and cheese trays are not sold heated, and Deli's customary practice when selling meat and cheese trays is to not physically give or hand napkins or other utensils to the customer. The meat and cheese trays are not prepared food since the meat and cheese are only sliced and repackaged and (a) are not sold heated, (b) Deli's customary practice is to not physically give or hand a napkin or other utensil to the customer with the purchase of a meat and cheese tray, and (c) plates, glasses, bowls, or cups are not necessary to receive the food.

Example 9 - Sales of Fresh Fruit Trays: Deli sells fresh fruit trays. Deli prepares the fresh fruit trays by selecting various fruits, washing them, slicing them into bite size pieces, and placing them on a platter. The fresh fruit trays are not sold heated and Deli's customary practice when selling fresh fruit trays is to not physically give or hand napkins or other utensils to the customer. The fresh fruit trays are not prepared food since the fruit is only sliced and re-

packaged and (a) they are not sold heated, (b) Deli's customary practice is to not physically give or hand a napkin or other utensil to the customer with the purchase of a fresh fruit tray, and (c) plates, glasses, bowls, or cups are not necessary to receive the food.

2. Purchases by Delis

Food, Food Ingredients, and Beverages

Exemption Certificate Not Required - Items that qualify for the exemption for food and food ingredients for human consumption that a deli purchases and resells may be purchased by the deli without issuing an exemption certificate. Examples of such items are meat, cheese, fruits, and vegetables. The listing on page 16 of this publication (*Exempt Food and Food Ingredients and Beverages*) shows examples of these items.

A deli is not required to provide the supplier of these types of items with an exemption certificate to purchase them without Wisconsin sales and use tax.

Exemption Certificate Required - Certain foods and food ingredients which a deli purchases and resells may only be purchased without Wisconsin sales and use tax if the deli provides the supplier with an exemption certificate claiming resale. Examples of such items are candy and soft drinks. See the listings on page 17 (*Taxable Food and Food Ingredients and Beverages*) for examples of items which may be purchased by a deli without Wisconsin sales and use tax if an exemption certificate claiming resale is provided to the supplier.

Preparation, Storage, and Serving Equipment

Non-Disposable Items - Purchases of items used by delis to prepare, store, and serve foods, food ingredients, and beverages to their customers are subject to Wisconsin sales and use tax. Examples of such items

include dishes, pots and pans, utensils, scales, and display cases.

Disposable Serving Items - Purchases of disposable items which are transferred to customers in conjunction with the sale of foods, food ingredients, and beverages, may be made without Wisconsin sales and use tax as purchases for resale. Examples include plastic and paper cups and plates, plastic eating utensils, paper napkins, straws, disposable place mats, and toothpicks. The deli must provide the supplier of these items an exemption certificate claiming resale to purchase them without Wisconsin sales and use tax.

Example - Disposable Serving Items: Deli provides paper plates and plastic cups, forks, and knives to its customers who purchase meals. Deli must provide the supplier of these items with an exemption certificate claiming resale to purchase them without Wisconsin sales and use tax.

Containers and Packaging Materials - A deli's purchases of containers and other packaging materials which are used to transfer deli items sold to customers are not subject to Wisconsin sales and use tax. The containers may or may not be returnable. To claim this exemption, the deli must provide its supplier with either the *Wisconsin Sales and Use Tax Exemption Certificate (Form S-211)*, or another fully completed exemption certificate claiming the appropriate exemption. **Note:** Packaging and shipping materials for use in packing, packaging, or shipping meat or meat products are exempt from Wisconsin sales and use taxes.

Examples of items purchased by delis which qualify for the container exemption include:

- Bags used to package meat and cheese
- Containers used to transfer potato salad and fruit salad to customers

- Dividers used to separate the food sections within a container
- Styrofoam trays used to transfer meals to customers
- Tape and rubber bands used to keep containers closed
- Cups used to transfer beverages sold to customers

Examples of items which **do not qualify** for the exemption for containers and packaging and shipping materials include:

- Wrapping equipment such as tape dispensers, paper holders, and staplers
- Price tags

E. Flower Shop Sales and Purchases

1. Sales by Flower Shops

Flowers, plants, floral arrangements, and similar items sold by a florist are subject to Wisconsin sales and use tax.

“Florist,” as used in this publication, means a business which sells cut flowers, potted plants, floral arrangements, and who prepares such flowers, floral arrangements, and potted plants. This includes a flower or garden shop in a grocery store. A “florist” as used in this publication does not include a person who sells cut flowers, floral arrangements, and potted plants primarily by mail or via the Internet.

Example: A florist sells a customer one dozen roses arranged in a vase for \$50. The \$50 charge by the florist is subject to Wisconsin sales tax.

If a florist sells and delivers flowers, plants, floral arrangements, etc., the florist's entire charge, including the delivery fee, is subject to Wisconsin sales tax.

Example: A Wisconsin florist receives an order from a customer to deliver a

floral arrangement to another person located in Wisconsin. The florist charges the customer \$30 for the floral arrangement plus a delivery charge of \$5. The entire \$35 charge is subject to Wisconsin sales tax.

Wire Delivery Services

A Wisconsin florist **taking an order from a customer and transmitting the delivery instructions** for that order to a second florist, should charge Wisconsin sales tax on its total sales, including any additional charge for the wire service, based on the location where the Wisconsin florist took the order. This is true whether the Wisconsin florist transmits the order to a second florist located in or outside of Wisconsin.

Example 1: A florist, located in Madison, WI, receives an order from a customer to direct a second florist, located in LaCrosse, WI, to deliver a floral arrangement, which sells for \$30, to a person located in LaCrosse. The Madison florist is liable for the Wisconsin sales tax on the \$30 it receives from the sale of the floral arrangement. The LaCrosse florist should not collect sales tax on this transaction.

Example 2: A florist, located in DeForest, WI, receives an order from a customer to direct a second florist, located in Phoenix, AZ, to deliver a floral arrangement, which sells for \$50, to a person located in Phoenix. The DeForest florist is liable for the Wisconsin sales tax on the \$50 received for this order.

A Wisconsin florist **receiving delivery instructions** for the delivery of flowers, plants, floral arrangements, etc. from a second florist, whether or not the second florist is located in Wisconsin, should not collect Wisconsin sales tax on these transactions.

Example 1: A Madison, WI florist receives delivery instructions from a

second florist, located in Superior, WI, to deliver a floral arrangement, which sells for \$30, to a person located in Madison. Since the Madison florist received its instructions from the Superior florist, the Madison florist should not collect sales tax on this transaction. The Superior florist is liable for Wisconsin sales tax on the \$30 charge.

Example 2: A Milwaukee, WI florist receives delivery instructions from a second florist, located in Iowa, directing the Milwaukee florist to deliver a Christmas wreath, which sells for \$50, to a business located in Milwaukee. Since the Milwaukee florist received its instructions from a second florist, the Milwaukee florist should not collect sales tax on this transaction. No Wisconsin sales tax is due on this transaction.

2. Purchases by Flower Shops

A florist may purchase the following items without Wisconsin sales and use tax:

- Flowers, vases, balloons, ribbons, and other items which it is going to resell to its customers
- Packaging materials and supplies such as wrapping paper, plastic bags, string, tape, etc., used to transfer flowers, plants, floral arrangements, and other items sold to its customers

The florist must provide the supplier of these items with an exemption certificate claiming resale.

A florist must pay Wisconsin sales and use tax on purchases of items such as:

- Equipment, including cash registers, coolers, display racks, scissors, tape dispensers, staplers, and similar items which the florist stores, uses, or consumes in Wisconsin
- Price tags

- Advertising materials, except catalogs, distributed in Wisconsin
- Other products in Part I.D.1. through 4. on page 7 not being resold and transferred to customers

F. Lottery Tickets

Sales of lottery tickets and the fee the grocer receives from the lottery commission are not subject to Wisconsin sales tax.

Purchases of equipment and supplies used to store and dispense lottery tickets are subject to Wisconsin sales and use tax.

G. Meat Department Sales and Purchases

1. Sales By Meat Departments

Meat and meat products, fish and fish products, seafood and seafood products, and poultry and poultry products, which are sold for human consumption, are not subject to Wisconsin sales tax. However, if any of these items are sold in a “heated” condition or otherwise meet the definition of “prepared food” contained on pages 10 through 14 of this publication, they are subject to Wisconsin sales or use tax.

Example 1 - Sale of Uncooked Chicken: Grocer sells uncooked chicken to Customer. The sale of the chicken is not subject to Wisconsin sales tax.

Example 2 - Sale of Heated Chicken: Grocer prepares heated chicken. Customer purchases eight pieces of the chicken while it is still hot. The sale is subject to Wisconsin sales or use tax as the sale of a prepared food.

Note: For additional information on sales of “prepared food” see Part III.D. on pages 28 through 33, titled “Deli Sales and Purchases.”

2. Purchases by Meat Departments

(**Note: Some** meat departments in grocery stores are considered to be manufacturers while other meat departments are **not** considered to be manufacturers. The determination of whether or not a meat department qualifies as a manufacturer and is entitled to certain sales and use tax exemptions depends on the specific facts and circumstances surrounding each meat department’s activities.)

For additional information for meat processors, see the tax release titled "[Meat Processors May Qualify as Manufacturers](#)," which was published in *Wisconsin Tax Bulletin* 112 (January 1999), on pages 36 to 38.

(a) Meat Department NOT Engaged in Manufacturing

Equipment and Supplies: Purchases of equipment and supplies used in meat departments which are **not** engaged in manufacturing are subject to Wisconsin sales and use tax.

Examples of taxable items used in these meat departments include:

- Meat cutters and saws
- Mixers and slicers
- Vacuum pack machines
- Scales
- Label printers and scale printers
- Grinders
- Wrapping equipment
- Cooling units
- Display cases
- Cleaning compounds and solvents used to clean equipment, walls, and floors
- Gloves and other wearing apparel used in the meat department

(b) Meat Department Engaged in Manufacturing

Certain processes performed by meat departments are considered to be manufacturing. Listed below are examples of three products produced by meat departments and the steps involved in making these products. The processes followed in producing the products in these examples are considered to be manufacturing processes. Processes similar to those described in these examples may or may not be considered to be manufacturing.

If you have a question as to whether or not your processes are considered to be manufacturing, you should send a written request for ruling to Attn: Administration Technical Services, Wisconsin Department of Revenue, Mail Stop 6-40, P.O. Box 8933, Madison, WI 53708-8933. A **complete** description of the step-by-step process upon which you are requesting a ruling must be included with your request.

The manufacturing process for each of the products in the examples below, begins with the removal of the raw materials from the raw materials storage area and generally ends at the point the finished product is first stored or displayed for sale. The manufacturing process also includes the packaging of the product if the product has not been stored or displayed for sale prior to it being packaged.

Machinery and Equipment – If machinery and equipment used by the meat department is used **exclusively and directly** in any of the three manufacturing processes described below, the machinery and equipment will qualify for exemption from Wisconsin sales and use tax. The grocer should provide the vendor of this machinery and equipment with either the *Wisconsin Sales and Use*

Tax Exemption Certificate (Form S-211), or another fully completed exemption certificate claiming the appropriate exemption.

Supplies – Supplies which become an ingredient or component part of the meat products or which are used exclusively and directly by a manufacturer in manufacturing and which are consumed, destroyed, or lose their identity in the manufacture of the meat products destined for sale, also qualify for exemption from Wisconsin sales and use tax. The grocer should provide the vendor of these supplies with either the *Wisconsin Sales and Use Tax Exemption Certificate (Form S-211)*, or another fully completed exemption certificate claiming the appropriate exemption.

Examples of Manufacturing Processes in Meat Departments

1. Bratwurst (Fresh) (No smoking required)

Step 1 – Raw meat is delivered in boxes. The meat is frozen when it arrives and it is put into a holding cooler to maintain the proper temperature to prevent spoiling.

Each box of meat contains a large chunk of beef. Various beef products can be made depending on which cut of beef is in the box. For example, a box may contain a “chuck” cut. The “chuck” cut is then cut into various products such as chuck eye roasts, top blade steaks, arm pot roast, etc.

Step 2 – The meat is transported from the holding cooler, where it was placed upon arrival, to the grinder. The grinder is used to grind the meat into the desired texture.

Step 3 – After the meat is ground, it is weighed. Weighing is necessary to

determine the proper amount of spices to be added to obtain the desired flavor.

Step 4 – After being weighed, the meat is placed in a mixer. Spices are added and the mixer mixes the meat and spices together.

Step 5 – After the product is mixed, it is moved to the stuffer. The stuffer is used to “force” the meat into the desired casings.

Step 6 – Once the stuffing process is completed, the product is placed into the package for which it will be offered for sale to the customer. The product is vacuum packed which assures the product is in an air tight container.

Step 7 – The product is placed in a cooler until such time as it is needed in the display case.

2. Smoked Wieners

Steps 1 through 5 are the same as for the Bratwurst (Fresh), explained above.

Step 6 – After the product is stuffed into the desired casings, it is placed on a rack. When the rack is full, the rack is placed in the smoker. The smoker adds the desired “smoked” flavor to the product.

Step 7 – After the product is smoked, it is placed in a cooler until the temperature of the product reaches the desired level.

Step 8 – Once the temperature of the product reaches the desired level, it is taken out of the cooler and packaged into the package for which it will be offered for sale to the customer. The product is vacuum

packed which assures the product is in an air tight container.

Step 9 – The finished product is placed in a cooler until such time as it is needed for retail or wholesale sale to customers.

3. Steaks and Roasts

Step 1 – Large chunks of raw meat are delivered in boxes. The meat is frozen when it arrives and it is put into a cooler to maintain the proper temperature to prevent spoiling.

Each box of meat contains a large chunk of beef. Various beef products can be made depending on which cut of beef is in the box. For example, a box may contain a “short loin” cut. The “short loin” cut is then cut into various products such as top sirloin, T-bone, porterhouse and tenderloin steaks. If the box contains a “chuck” cut, the “chuck” cut is then cut into various products such as chuck eye roasts, top blade steaks, pot roasts, etc.

Step 2 – The appropriate box of meat (depending on the end product desired), is transported from the holding cooler where it was placed upon arrival to the store, to the saw. The saw is used to cut the large chunks of meat that arrived at the store, into the smaller individual products.

Step 3 – After being cut, the smaller cuts of meat are placed on trim tables. At the trim tables, excess fat and unwanted portions of the meat are removed to get the product into the condition for sale to the customer.

Step 4 – Once the product has been trimmed, it is placed onto a packaging tray.

Step 5 – After the product is on the packaging tray, it is sent through the “auto wrapper,” which is a machine that wraps the plastic around the product to seal it.

Step 6 – Once the product is wrapped, it is placed on a metal tray. Once the metal tray is full, the product is transported to the cooler where it will be held until needed for retail or wholesale sale to customers.

Meat and Meat Products: Purchases of meat and meat products, fish and fish products, seafood and seafood products, poultry and poultry products, and other items which the meat department resells, may be purchased without Wisconsin sales and use tax. Part III.A. on pages 15 and 16 (*Exempt Food and Food Ingredients and Beverages*) of this publication contains additional information on types of items which qualify for the exemption for food and food ingredients for human consumption.

If the items being purchased qualify for the exemption for food and food ingredients for human consumption, the meat department does not need to provide the supplier with an exemption certificate to purchase them without Wisconsin sales and use tax.

However, if the items being purchased by the meat department do not qualify for the exemption for food and food ingredients for human consumption, the meat department must provide the supplier with an exemption certificate claiming resale (or other appropriate exemption), to purchase these types of items without Wisconsin sales and use tax.

Packaging and Shipping Materials: Containers, bags, boxes, and other packaging and shipping materials used to transfer merchandise to customers are not subject to Wisconsin sales and use tax. A meat department must provide its supplier with either the *Wisconsin Sales and Use Tax Exemption Certificate (Form S-211)*, or another fully completed exemption certificate claiming the appropriate exemption to purchase these types of items without paying Wisconsin sales and use tax.

In addition, a **meat department** may also purchase meat casings, wrapping paper, tape, containers, bags, and boxes used in packaging **meat and meat products** without paying Wisconsin sales and use tax, regardless of whether such items are used to transfer merchandise to customers. The meat department must provide its supplier of these items with either the *Wisconsin Sales and Use Tax Exemption Certificate (Form S-211)*, or another fully completed exemption certificate claiming the appropriate exemption.

H. Money Orders and Check Cashing

Sales of money orders and fees received from check cashing services are not subject to Wisconsin sales tax.

Example: Customer purchases a \$100 money order from Grocer for \$101. The \$1 service fee Grocer receives is not subject to Wisconsin sales tax.

Purchases of blank money order forms by a grocer which are used or transferred to customers in conjunction with the selling, performing, or furnishing of a service are subject to Wisconsin sales and use tax.

Example: Grocer purchases 200 blank money order checks for \$40. The checks are transferred to customers in conjunction with the customer’s purchase of a money order.

Grocer's purchases of blank money orders are subject to Wisconsin sales and use tax.

I. Photography Sales and Purchases

1. Sales of Photography Related Items

Taxable sales include:

- Sales of undeveloped film, camera batteries, flash bulbs, and other photographic supplies and accessories
- Developing, processing, printing, and enlarging film, photographs, and slides
- Sales of CDs that contain the customer's pictures
- Sales of specified digital goods (See [Publication 240](#), *Digital Goods*, for additional information)

2. Purchases of Photography Related Items

Purchases which may be made without Wisconsin sales and use tax include:

- Undeveloped film, camera batteries, flash bulbs, and other photographic supplies and accessories which are resold to customers
- Developing, processing, printing, and enlarging services which are resold to customers
- Machinery and equipment used exclusively and directly in developing exposed film into negatives and printing the completed photographs
- Chemicals and other supplies consumed, destroyed or losing its identity in the developing of the exposed film into negatives and printing the completed photographs

The grocer must provide the supplier of these items and services with an exemption certificate to purchase them without Wisconsin sales and use tax.

Example 1 - Film Developing (Purchase and Sale): Grocer receives two rolls of film from a customer which are to be developed into photographs. Grocer charges \$10 for the service. Grocer A sends the film received from its customer to Developer. Grocer is charged \$5 by Developer for the developing services. Grocer provides the photographs to its customer. The \$10 charge by Grocer to its customer is subject to Wisconsin sales tax. The \$5 charge by Developer to Grocer is not subject to Wisconsin sales tax because Grocer is reselling the service. Grocer must provide Developer with an exemption certificate claiming resale to purchase the developing service without Wisconsin sales and use tax.

Example 2 - Film Developing Equipment: Grocer operates a grocery store. Included in the grocery store is a photo department. The photo department provides photofinishing services (i.e., develops exposed film into color photographs). Grocer's purchases of the machines and equipment from Supplier which are used exclusively and directly in developing the exposed film and printing the photographs are exempt from Wisconsin sales and use tax. Grocer must provide Supplier with either the *Wisconsin Sales and Use Tax Exemption Certificate (Form S-211)*, or another fully completed exemption certificate claiming the appropriate exemption to purchase the machinery and equipment without paying Wisconsin sales and use tax.

J. Vending Machine Sales and Purchases

1. Sales Through Vending Machines

(a) Exempt Vending Machine Sales

Sales of food, food ingredients, and beverages from vending machines are subject to Wisconsin sales or use tax if

the item being sold meets the definition of “candy,” “dietary supplement,” “soft drink,” or “prepared food,” as those terms are defined on pages 8 to 15 of this publication.

Examples of exempt sales from vending machines, assuming the items do not meet the definition of “candy,” “dietary supplement,” “soft drink,” or “prepared food,” as those terms are defined on pages 8 to 15 of this publication, include:

- Beverages that contain milk or milk products
- Cookies
- Donuts
- Fruit
- Granola bars that contain flour
- Ice tea that is not sweetened
- Juices that are more than 50% fruit or vegetable juice by volume
- Milk
- Peanuts that are plain or just salted
- Potato chips and corn chips
- Pretzels
- Raisins that are not sweetened
- Water that is not sweetened
- Yogurt

(See pages 15 and 16 of this publication, under the heading “*Exempt Food and Food Ingredients and Beverages*,” for more examples.)

Example: Grocer sells fruit, milk, and potato chips through vending machines located in the employee break room. Such sales are exempt from Wisconsin sales tax.

(b) Taxable Vending Machine Sales

Sales of the following items from vending machines are taxable:

- Soft drinks
- Candy and chewing gum
- Cigarettes and other tobacco products

- Heated foods, heated beverages, and other prepared foods
- Dietary supplements
- Fermented malt beverages and intoxicating liquors
- Photocopies
- Non-food items, except newspapers (See pages 18 to 19 of this publication for examples of non-food items.)

(c) Who is Responsible for Tax?

If the grocer “controls” or is the “operator” of the machine, the grocer is responsible for reporting the Wisconsin sales tax on taxable sales from the vending machines. A grocer is considered to have “control” over the vending machine or be the “operator” of the vending machine if the grocer has the right to access the machine for stocking, restocking, or removing the money or if the grocer owns the items being sold through the vending machine.

If a grocer receives commissions based on the vending machine sales from a third-party who controls the vending machine, the commissions received by the grocer are not subject to Wisconsin sales tax. The third-party is responsible for reporting the Wisconsin sales tax on the sales from the vending machine.

Example 1 - Grocer Controls Machine:

Grocer owns a vending machine which dispenses candy. The grocer has the right to access the machine, stock the machine, and remove the money from the machine. The total sales by Grocer through the vending machine are subject to Wisconsin sales tax.

Example 2 - Grocer Receives Commission:

Grocer receives a commission from Vending Company equal to 50% of the total sales from a soft drink vending machine in return for allowing Vending Company’s vending machine to be placed in his store. Grocer is not respon-

sible for stocking, restocking, or removing the money from the vending machine. The total sales from the vending machine are \$1,000. Grocer receives a commission of \$500. The \$500 commission received by Grocer is not subject to Wisconsin sales or use tax. However, Vending Company's **total sales** from the vending machine of \$1,000 are subject to Wisconsin sales tax and must be reported on Vending Company's sales and use tax return.

2. Computing Taxable Receipts From Vending Machines

The method of computing taxable receipts from a vending machine depends on whether or not the operator conspicuously posts a sign indicating that the prices of the items in the machine include sales tax.

Sign Conspicuously Posted - The operator must report the total sales from the vending machine, including sales tax, on line 1 of his or her sales and use tax return. If the operator conspicuously posts a sign informing customers that the prices include sales tax, the operator may claim a deduction on its sales and use tax return for the sales tax included in line 1.

Sign Not Conspicuously Posted - The operator must report the total sales from the vending machine on line 1 of his or her sales and use tax return. If the operator does not conspicuously post a sign indicating that the prices include sales tax, the operator **may not** claim a deduction on its sales and use tax return for any sales tax on these sales.

Example: Grocer operates two soft drink vending machines and conspicuously posts a sign indicating the prices of the items in the vending machines include the 5% Wisconsin sales tax. The total sales from the machines are \$1,000. The grocer must report the \$1,000 on line 1 of his or her sales and use tax re-

turn. Since the grocer conspicuously posted a sign indicating that the prices included sales tax, the grocer may also claim a deduction of \$47.62 on its sales and use tax return for sales tax included in the prices of the items sold through the vending machines. The \$47.62 is computed as follows: \$1,000 (total sales) divided by 1.05 (1 plus tax rate) = \$952.38 (taxable receipts); \$1,000 - \$952.38 = \$47.62 (tax included in total sales).

Note: If the grocer in the example above had not conspicuously posted a sign indicating the prices included sales tax, the grocer would still report the \$1,000 on line 1 of the sales and use tax return, but the grocer **may not** claim a deduction on its sales and use tax return for any sales tax included and would report taxable receipts of \$1,000 instead of \$952.38.

3. Purchases for Vending Machines

A grocer's purchases of items which are resold through vending machines may be purchased without Wisconsin sales and use tax. Depending on the type of item being purchased, the grocer may need to provide the supplier with an exemption certificate claiming resale to purchase these items without Wisconsin sales and use tax. See Part III.A.1. on pages 16 and 17 (*Taxable Food and Food Ingredients and Beverages*) for information on when an exemption certificate claiming resale must be issued to purchase items without Wisconsin sales and use tax.

A grocer's purchase of vending machines and repairs and parts for the machines are subject to Wisconsin sales and use tax.

K. Video Department Rentals, Sales, and Purchases

1. Rentals and Sales by Video Departments

Taxable sales include:

- Rentals and sales of DVDs, video tapes, video games, video cassette recorders (VCRs), DVD players, video game machines, and related accessories.
- Charges for video club membership cards, which entitle the member to reduced rental rates and related privileges.

Example - A video department in a grocery store rents two DVDs for \$2 each and a DVD player for \$10 to a customer. In addition, for a \$10 fee, the customer becomes enrolled in the grocery store's video club. The \$10 fee entitles the customer to reduced price DVD rentals for the next 12 months. The entire \$24 the video department charges the customer is subject to Wisconsin sales tax.

- Late fees, and other service charges related to the sale or rental of video tapes, DVDs, VCRs, etc.

Note: Rewinding fees for video tapes are not taxable.

Example - A video department charges a \$2 per video per day late fee for videos returned late and a \$1 per video rewind fee for customers who fail to rewind the video tapes prior to returning them to the grocery store. Customer returns two video tapes two days late and fails to rewind the video tapes. The video department charges Customer an \$8 late fee and a \$2 rewind fee. The \$8 late fee is subject to Wisconsin sales tax. The \$2 rewind fee is not subject to Wisconsin sales tax.

2. Purchases by Video Departments

Property Rented - Purchases of video tapes and games, video cassette recorders (VCRs), video game machines, DVDs, DVD players, lubricants, and repair parts and services for VCRs, DVD players, and video game machines used solely for rental purposes are not subject to Wisconsin sales or use tax. Items used solely for rental purposes and the repairs of those items may be purchased

without Wisconsin sales and use tax as purchases for resale. The video department must provide the supplier with a properly completed exemption certificate claiming resale to purchase these items without paying Wisconsin sales or use tax.

Example - Video Department has a VCR which is used solely for rental purposes. Video Department pays a repair company \$100 to repair the VCR. The VCR repair service is not subject to Wisconsin sales and use tax because it is a purchase for resale. Video Department must provide the repair company with an exemption certificate claiming resale to purchase the repair service without Wisconsin sales and use tax.

Property, Items, and Goods Used in Video Department - Purchases of any of the items described in Part I.D. 1. to 4. on page 7 used in the video department (e.g., television sets, VCRs, DVD players, shelving, etc.) are subject to Wisconsin sales or use tax.

Example: Video Department uses a television and DVD player to play DVDs in the store. The television and DVD player are not rented out to customers. Video Department owes Wisconsin sales or use tax on the purchase price of the DVD player and television.

Property, Items, and Goods Both Rented and Used Personally - If videos, DVDs, DVD players and VCRs are purchased by a video department and are used part of the time in the business and rented out part of the time, the purchases of the videos, DVDs, DVD players, and VCRs are subject to Wisconsin sales and use tax. The video department's rental receipts for the videos, DVDs, DVD players, and VCRs are also subject to Wisconsin sales tax.

3. Containers for Videos, DVDs, DVD Players, and VCRs

A video department's purchases of containers, boxes, bags, labels, and other packaging and shipping materials which are used to transfer video tapes, DVDs, and games, DVD players, VCRs, and video game machines to the video department's customers are exempt from Wisconsin sales and use tax.

Example – Grocer purchases 200 plastic DVD containers used to protect the DVDs which are rented to Grocer's customers. Grocer may purchase the containers without paying Wisconsin sales and use tax. Grocer must provide the supplier of the DVD containers with a properly completed exemption certificate claiming resale to purchase the containers without paying Wisconsin sales and use tax.

Note: If the containers are used to transfer items which are not sold or rented to customers, the containers may not be purchased without Wisconsin sales and use tax.

L. Video Games and Amusement Devices

1. Total Sales From Video Games and Amusement Devices

Total sales from coin-operated video games and amusement devices, such as pinball machines and mechanical rides, are subject to Wisconsin sales tax.

If the grocer "controls" or is the "operator" of the machine, the grocer is responsible for reporting the Wisconsin sales tax on its total sales from the video games and amusement devices. A grocer is considered to have "control" over or be the "operator" of the video games and amusement devices if the grocer has the right to remove the money or if the grocer owns the video games and amusement devices.

If a grocer receives commissions based on the video game and amusement device sales from a third party who controls the video game or amusement device machine, the commissions received by the grocer are not subject to Wisconsin sales tax. The third party is responsible for reporting the Wisconsin sales tax on the **total sales** from the video games and amusement devices.

2. Computing Taxable Receipts From Video Games and Amusement Devices

The method of computing taxable receipts from coin-operated video machines and amusement devices depends on whether or not the grocer conspicuously posts a sign indicating that the price to play the machine or device includes sales tax.

Sign Conspicuously Posted - The operator must report the total sales from the video games and amusement devices, including the sales tax, on line 1 of his or her sales and use tax return. If the operator conspicuously posts a sign informing customers that the price includes sales tax, the operator may also claim a deduction on his or her sales and use tax return for the sales tax included in line 1.

Sign Not Conspicuously Posted - The operator must report the total sales from the video games and amusement devices on line 1 of his or her sales and use tax return. If the operator does not conspicuously post a sign indicating that the price includes sales tax, the operator **may not** claim a deduction on his or her sales and use tax return for any sales tax on these sales.

Example: Grocer operates a video game and conspicuously posts a sign indicating that the price includes the 5% Wisconsin sales tax. The total sales from the game are \$500. Grocer must report the \$500 on line 1 of his sales and use tax return. Since Grocer conspicuously posted a sign indicating that the price in-

cluded sales tax, Grocer may also claim a deduction of \$23.81 on his sales and use tax return for sales tax included in the price to play the video game. The \$23.81 is computed as follows: \$500 (total sales) divided by 1.05 (1 plus tax rate) = \$476.19 (taxable receipts); \$500 - \$476.19 = \$23.81 (tax included in total sales).

Note: If the grocer in the above example had not conspicuously posted a sign indicating the prices included sales tax, the grocer would still report the \$500 on line 1 of his or her sales and use tax return, but the grocer **may not** claim a deduction on its sales and use tax return for any sales tax included and would report taxable receipts of \$500 instead of \$476.19.

3. Purchases of Video Games and Amusement Devices

A grocer's purchases of coin-operated video games and amusement devices and the repairs and parts for the machines are subject to Wisconsin sales or use tax.

IV. OTHER RELATED ITEMS

A. Discounts, Coupons, Rebates, and SNAP (Food Stamps)

Are discounts, coupons, and rebates subject to Wisconsin sales tax? The answer depends on whether the grocer or the manufacturer offers the discount, coupon, or rebate and whether the item being sold is subject to Wisconsin sales tax.

1. Manufacturer's Discounts, Coupons, and Rebates

Manufacturer's Discounts, Coupons, and Rebates - Taxable Items: Payments received by a grocer from a manufacturer for coupons issued by the manufacturer, redeemed by the grocer, and which entitle the customer to a "free" taxable item or reduce the price paid for a taxable item, are part of

the "sales price" of the taxable item and are subject to Wisconsin sales tax. A grocer may charge the customer the sales tax due. However, coupon handling fees paid by the manufacturer to the grocer are not subject to Wisconsin sales tax.

Example 1 - Manufacturer's Coupon for Free Candy Bar: Customer receives a manufacturer's coupon for a free candy bar, which normally sells for 75¢. Customer gives Grocer the coupon and receives a candy bar. Grocer then provides the coupon to Manufacturer, who pays Grocer 75¢ plus a 10¢ handling fee for the coupon.

Since the candy bar is a taxable item, Grocer reports the 75¢ as receipts subject to Wisconsin sales tax. Grocer may charge Customer the sales tax due on the 75¢. The 10¢ handling fee is not subject to Wisconsin sales tax.

Example 2 - Manufacturer's Coupon for Reduced Price Laundry Soap: Customer purchases a box of laundry detergent which Grocer sells for \$4. Customer presents to Grocer, a coupon from Manufacturer which entitles Customer to 50¢ off the \$4 selling price of the detergent. Grocer provides the coupon to Manufacturer who pays Grocer 50¢ plus a 10¢ handling fee for each coupon redeemed. The amount subject to Wisconsin sales tax is \$4, which is the \$3.50 received from Customer plus the 50¢ received from Manufacturer. Grocer may charge Customer Wisconsin sales tax on the entire \$4. However, the 10¢ handling fee is not subject to Wisconsin sales tax.

Manufacturer's Coupons and Rebates - Nontaxable Items: Payments received by a grocer from a manufacturer for coupons issued by the manufacturer, redeemed by the grocer and which entitle the customer to a "free" **nontaxable** item or reduce the price paid for a **nontaxable** item, are not subject

to Wisconsin sales tax. In addition, the coupon handling fees paid by the manufacturer to the grocer for these items are also not subject to Wisconsin sales tax.

Example 1 - Manufacturer's Coupon for Free Orange Juice: Customer receives a manufacturer's coupon which entitles Customer to a free gallon of 100% pure orange juice. Customer gives Grocer the coupon and receives the orange juice, which usually sells for \$2.75. Grocer provides the coupon to Manufacturer who pays Grocer \$2.75 plus a 50¢ handling fee.

Since orange juice is a nontaxable item, the \$2.75 received from Manufacturer is not subject to Wisconsin sales tax. The 50¢ handling fee is also not subject to Wisconsin sales tax.

Example 2 - Manufacturer's Coupon for Reduced Price Coffee: Customer purchases a can of coffee which Grocer usually sells for \$10. Customer presents a coupon from Manufacturer which entitles Customer to \$1 off the selling price of the coffee. Grocer provides the coupon to Manufacturer who pays Grocer \$1 plus a 25¢ handling fee for each coupon redeemed.

The \$9 received from Customer is not subject to Wisconsin sales tax because cans of coffee are not subject to Wisconsin sales tax. The \$1 received from Manufacturer is not subject to Wisconsin sales tax because the amount is related to an item (can of coffee) which is not subject to Wisconsin sales tax. The 25¢ handling fee is also not subject to Wisconsin sales tax.

2. Grocer's Discounts and Coupons

Discounts and coupons offered by grocers and which are not reimbursed by a third party are not subject to Wisconsin sales tax. This includes discounts offered by grocers

where the grocer "matches" a discount offered by a manufacturer (e.g., double coupon days). No Wisconsin sales tax should be charged on the discounts and coupons offered by grocers. See Part IV.A.1. on pages 44 to 45 for the treatment of manufacturer's coupons.

Grocer's Discounts and Coupons - Taxable Items: The following examples describe the tax treatment of discounts and coupons offered by grocers on taxable items.

Example 1 - Grocer's Coupon Offered for Reduced Price Item: Grocer offers a coupon which entitles customers to 50¢ off the purchase price of a 12-pack of soft drinks. The 12-pack usually sells for \$4.50. Customer provides Grocer with the coupon when purchasing the soft drinks along with \$4. Grocer's total sales subject to Wisconsin sales tax from the soft drinks are \$4 (\$4.50 - 50¢ coupon = \$4). Grocer should charge Customer sales tax on the \$4.

Example 2 - Grocer's Coupon Offered for Free Items - No Purchase Required: Grocer offers a coupon which entitles a customer to a free package of napkins. Customer presents the coupon to Grocer. Since Grocer did not have any receipts with respect to the napkins, no sales tax is due on the transfer of the napkins to Customer. However, Grocer is liable for Wisconsin sales and use tax on Grocer's purchase price (cost) of the napkins. Grocer should not charge Customer any tax on these napkins.

Example 3 - Grocer's Coupon Offered for Free Taxable Item - Purchase of Taxable Item Also Required: Grocer offers a coupon which entitles a customer to free napkins with the purchase of paper plates (a taxable item). Customer purchases the paper plates and receives the free napkins.

Since the napkins are being provided free of charge to Customer, Grocer is required to pay Wisconsin sales or use tax on its purchase price of the napkins.

Example 4 - Grocer's Coupon Offered for Free Taxable Item - Purchase of Nontaxable Item Required: Grocer offers a coupon which entitles a customer to a free package of napkins with the purchase of frozen chicken (a nontaxable item). The napkins cost the grocer 60¢ per package. Customer purchases the frozen chicken and receives the free napkins.

Since the napkins are being provided free of charge to Customer, Grocer is required to pay Wisconsin sales or use tax on its purchase price of the napkins.

Example 5 - Grocer's Coupon Offered for Free Taxable Item - Purchase of Both Taxable and Nontaxable Items Also Required: Grocer offers a coupon which entitles a customer to free napkins with the purchase of \$20 or more of other items in the grocery store. The napkins cost the grocer 60¢ and normally sell for \$1. The \$20 or more worth of items being purchased by a customer is made up of different taxable and nontaxable items.

Customer purchases \$15 of taxable items and \$10 of nontaxable items and receives the free napkins.

Since the napkins are being provided free of charge to Customer, Grocer is required to pay Wisconsin sales or use tax on its purchase of the napkins.

Grocer's Discounts and Coupons - Nontaxable Items: Discounts and coupons offered by grocers on *nontaxable* items do not affect the amount of sales subject to Wisconsin sales tax.

Example 1 - Grocer's Coupon for Free Potato Chips: Grocer offers a coupon for a free bag of potato chips. Customer presents the coupon to Grocer and receives the potato chips. Grocer does not report any sales subject to Wisconsin sales tax on this transaction. In addition, since potato chips are an exempt food or food ingredient, Grocer is not liable for any Wisconsin sales or use tax on its purchase price of the potato chips.

Example 2 - Grocer's Coupon for Reduced Price Soup: Grocer offers a coupon which entitles customers to 25¢ off the purchase price of a can of soup which usually sells for \$1. Customer presents the coupon to Grocer and pays 75¢ for a can of soup. Since cans of soup are not subject to Wisconsin sales tax, the 75¢ received from Customer is not subject to Wisconsin sales tax.

3. SNAP (EBT, Food Stamps)

A grocer's receipts from SNAP, formerly known as the federal food stamp program, are not subject to sales tax even if the items purchased by the consumer are not exempt food or food ingredients. The recipient is provided with an EBT card which they can use to make purchases from an EBT SNAP account. A sale using an EBT card is considered to be made to the federal government.

Example 1 - Purchase With EBT: Customer purchases a 12-pack of soft drinks for \$4.00. Customer pays for the 12-pack using his EBT card. The sale is exempt from tax, since it is considered to be a sale to the federal government.

Example 2 - Purchase With Manufacturer's Coupon, No EBT: Customer purchases a 12-pack of soft drinks for \$4.00. Customer presents a manufacturer's coupon for \$1.00 off the \$4.00 purchase price. Customer pays for the 12-pack using \$3.00 cash along with the \$1.00 off manufacturer's coupon. The

entire \$4.00 is subject to Wisconsin sales or use tax. The \$3.00 received from the customer and the \$1.00 received from the manufacturer are all part of the "sales price" of the 12-pack of the soft drinks.

Example 3 - Purchase With Manufacturer's Coupon and EBT: Customer purchases a 12-pack of soft drinks for \$4.00. Customer presents a manufacturer's coupon for \$1.00 off the \$4.00 purchase price. Customer pays for the 12-pack using her EBT card for \$3.00 along with the \$1.00 off manufacturer's coupon. Only the \$1.00 reimbursement the retailer receives from the manufacturer is subject to Wisconsin sales or use tax. The \$3.00 from the customer uses from the EBT SNAP account to purchase the soft drinks is exempt from Wisconsin sales or use tax since this is considered to be a sale to the federal government.

B. Returns and Allowances

If an item is sold and Wisconsin sales tax is collected on the sale of the item, and that item is later returned, a credit may be claimed on the sales and use tax return covering the period in which the return or allowance is provided to the customer.

Example - Taxable Item Returned: In June 2010, Customer purchases paper towels from Grocer. Grocer charges Customer \$2.10 (\$2 plus \$.10 of sales tax) for the paper towels and reports the \$2 of taxable receipts on its June 2010 sales and use tax return. Customer returns the paper towels to Grocer in July 2010 and receives a \$2.10 refund. Grocer may claim a credit of \$2 on its July 2010 sales and use tax return for the refund provided to Customer with respect to the paper towels Customer returned.

If an item is sold and Wisconsin sales tax is **not** collected on the sale of the item and that item is later returned, no credit may be claimed on the sales and use tax return covering the period in

which the return or allowance is provided to the customer.

Example - Exempt Item Returned: Customer purchases bread (exempt item) from Grocer. Grocer charges Customer \$1 for the bread. Customer C later returns the bread to Grocer and receives a \$1 refund. Since the \$1 sale of the bread was not subject to Wisconsin sales tax, Grocer may not claim a credit of \$1 on its sales and use tax return for the refund provided to Customer with respect to the bread Customer returned.

C. Items Given to Customers for Free

Exempt Items: When a grocer gives items to its customers for free and the free item is exempt from Wisconsin sales and use tax (e.g., crackers), no tax is due from the grocer **or** the customer on the item.

Example - Exempt Item Given Away: Grocer provides free crackers for its customers. Since crackers are an exempt food item, neither Grocer nor the customers are liable for Wisconsin sales or use tax on the crackers.

Taxable Items: If an item described in Part I.D. 1. to 4. on page 7 is given away free (e.g., samples of laundry detergent), a grocer is liable for Wisconsin sales and use tax when purchasing such property. If the taxable item given to customers was acquired by the grocer without tax for resale, the grocer must report Wisconsin use tax based on the grocer's purchase price of the item.

Example - Taxable Items Given Away: Grocer purchases 2,000 plastic mugs for \$1,000 from Supplier. Grocer provides Supplier with an exemption certificate claiming resale since Grocer does not know whether the mugs will be sold or given away. Grocer decides to give the mugs to the first 2,000 customers. Grocer is liable for use tax based on its purchase price of the mugs (i.e., \$1,000).

D. Containers and Other Packaging and Shipping Materials

1. General

A grocer's purchases of returnable and non-returnable containers, labels, sacks, cans, boxes, drums, bags, or other packaging and shipping materials are not subject to Wisconsin sales and use tax if the items (e.g., grocery bags) are used to transfer merchandise to the grocer's customers. (See the section below titled "Meat and Meat Product Containers, Packaging, and Shipping Materials" for information on meat and meat product containers and packaging and shipping materials.)

Example - Grocery Bags for Transferring Groceries to Customers: Grocer purchases bags used to pack customer's groceries. Customers use the bags to carry their groceries from the grocery store to their homes. Since the bags are being used to transfer groceries sold to their customers, Grocer's purchases of the grocery bags are not subject to Wisconsin sales and use tax. Grocer must provide the supplier of these bags with a properly completed exemption certificate to purchase them without Wisconsin sales and use tax.

When a grocer sells (rather than gives away) a disposable or reusable grocery bag to its customer, the tax treatment is as follows:

- The grocery may purchase the grocery bag without tax for resale.
- The grocer's sale of the grocery bag is taxable.

2. Meat and Meat Product Containers, Packaging, and Shipping Materials

Meat casings, wrapping paper, tape, containers, labels, sacks, cans, boxes, drums, bags, or other packaging and shipping materials used in packing, packaging, or shipping meat or meat products are not subject to

Wisconsin sales and use tax, even if these items are not used to transfer **meat or meat products** sold to customers.

Example - Meat Wrapping Paper Not Used to Transfer Merchandise to Customers: Grocer operates a store that is equipped to process meat. Once processed and packaged, the meat is placed on metal racks which are lined with wrapping paper and placed in the freezer until there is room for the meat in the display cases. Even though the wrapping paper used to line the metal trays is not used to transfer the meat to customers, the wrapping paper is exempt from Wisconsin sales and use tax because it is used in packaging and shipping **meat** from the freezer to the display cases. Grocer must provide the supplier of the wrapping paper with a properly completed exemption certificate to purchase it without Wisconsin sales and use tax.

Examples of Containers and Packaging and Shipping Materials Which Qualify for Exemption

Examples of items which qualify for the exemption for containers and other packaging and shipping materials include:

- Containers such as barrels, bottles, cartons, and kegs
- Items used inside a package to shape, form, preserve, stabilize, or protect the contents, including batting, cardboard fillers, cotton, dry ice, excelsior, ice, separators, and shredded paper
- Packaging and shipping materials, including crates, crating material, gummed tape, mailing tubes, pallets, rope, rubber bands, skids, twine, and wrapping paper

Examples of Containers and Packaging and Shipping Materials Which Do Not Qualify for Exemption

Examples of items which **do not qualify** for this exemption include:

- Shopping carts, baskets, and similar items
- Wrapping equipment, such as paper holders, tape dispensers, staplers, and string holders
- Counter display cards used for advertising and display purposes
- Computer-produced gummed label mailing lists used to address envelopes. However, labels for envelopes used to transfer merchandise to customers are exempt
- Containers or other packaging and shipping materials used for storage or to transfer merchandise owned by the same person from one location to another (**Note:** Containers and other packaging and shipping materials used to transfer meat and meat products are exempt even if used for transferring meat and meat products owned by the same person from one location to another.)
- Advertising matter used in Wisconsin in connection with the sale of merchandise, except catalogs used to advertise and promote the sale of merchandise

3. Deposits on Returnable Containers

Grocers have a choice of whether or not to charge Wisconsin sales tax on deposits for returnable containers. The “net” amount of tax charged and remitted to the Department of Revenue will be the same under either method of reporting.

Grocer Charges Wisconsin Sales Tax on Deposits: If a grocer chooses to charge customers sales tax on deposits of returnable containers, then the grocer must also refund

the sales tax charged on the deposit when the deposit is refunded to the customer.

Grocers using this method must include on line 1 of their sales and use tax return, the selling price of the item, the deposit on the container, and the sales tax charged. The grocer may claim a deduction on its sales and use tax return for the sales tax included on line 1.

When the deposit is returned to the customer, the grocer must refund the amount of the deposit plus the sales tax charged on the deposit. The grocer may claim a deduction on its sales and use tax return which covers the date the refund is given to the customer, for the amount of the deposit refunded to the customer.

Grocer Does Not Charge Wisconsin Sales Tax on Deposits: If a grocer chooses not to charge Wisconsin sales tax on deposits, then the grocer should not refund any sales tax to the customer when the deposit is refunded.

Grocers using this method must include on line 1 of their sales and use tax return, the selling price of the item, the deposit on the container and the sales tax charged. The grocer may claim a deduction on its sales and use tax return for the sales tax and deposits included on line 1.

When the deposit is returned to the customer, the grocer should refund only the deposit (no sales tax) to the customer. The grocer must not claim a deduction on its sales and use tax return for the deposit returned to the customer because the grocer did not previously report the deposit as a taxable sale.

Note: If no Wisconsin sales tax is charged on deposits and the deposits are not refunded to customers (i.e., customer does not return container), the grocer is liable for Wisconsin sales tax on the deposit at the time the deposits are recognized as income for income tax purposes if the container is used to transfer property in a taxable sale.

Example - Deposits on Containers: The following example shows what amounts a grocer should report on his or her sales and use tax return relating to the sales of taxable property, items, or goods and deposits on containers.

Assume the following facts apply:

- Customer purchases 2 barrels of beer (1 from Grocer A and 1 from Grocer B). Grocer A and Grocer B each charge Customer \$50 for the barrel of beer and a deposit of \$10 on each of the barrels. The deposits are refunded to Customer when the barrel is returned.
- **Tax Charged on Deposit: Grocer A** charges Customer the following: \$50 for the beer, \$10 for the deposit on the barrel and \$3.00 sales tax ($\$60 \times .05 = \3.00). Grocer A gives Customer \$10.50 (\$10 plus tax) when he returns the barrel for his deposit.
- **No Tax Charged on Deposit: Grocer B** charges Customer the following: \$50 for the beer, \$10 for the deposit on the barrel and \$2.50 sales tax ($\$50 \times .05 = \2.50). Grocer B gives Customer \$10 when he returns the barrel for his deposit.

The following tables indicate the amounts Grocer A and Grocer B should report on their Wisconsin sales and use tax returns to report the sale (Table 3) and refund of the deposit (Table 4) to Customer. The amounts in the center and right columns of Tables 3 and 4 are the amounts Grocers A and B, respectively, should report on their Wisconsin sales and use tax return.

Table 3 – Amounts to Report at Time of Sale

	Grocer A - Tax Charged on Deposit	Grocer B - Tax Not Charged on Deposit
Total Sales Price	\$63.00	\$62.50
Deductions Allowed	\$3.00	\$12.50
Taxable Receipts Reported	\$60.00	\$50.00

Table 4 – Amounts to Report When Deposit Refunded

	Grocer A - Tax Charged on Deposit	Grocer B - Tax Not Charged on Deposit
Total Sales Price	\$0	\$0
Deductions Allowed	\$10	\$0
Taxable Receipts	(\$10)	\$0

E. Equipment and Business Asset Sales and Purchases

1. Sales of Equipment and Business Assets

Sales of equipment and business assets that are any of the items described in Part I.D.1. through 4. on page 7, (e.g., equipment, furniture, and fixtures) are subject to Wisconsin sales tax if a grocer holds or is required to hold a seller’s permit at the time of sale. However, sales of equipment and business assets are not subject to Wisconsin sales and use tax if both of the following conditions are met:

- (a) The sale is of an item described in Part I.D.1. through 4. on page 7, (other than inventory held for sale) which was previously used by the seller to conduct

a trade or business at a particular location, and

- (b) The sale occurs after the seller ceases operating as a seller of any of the items described in Part I.D.1. through 4. on page 7, or taxable services at that location.

A sale meeting the above two conditions is not subject to Wisconsin sales and use tax, even though the seller holds a seller's permit for one or more other locations at the time of the sale. **Exception:** A grocer that holds or is required to hold a seller's permit for one or more other locations at the time of the sale of a motor vehicle, boat, snowmobile, recreational vehicle as defined in [sec. 340.01\(48r\)](#), Wis. Stats., semitrailer, all-terrain vehicle, or aircraft is required to collect and remit the Wisconsin sales or use tax on its sales of these items. In addition, if the grocer does not collect the tax, the purchaser is still required to pay the applicable sales or use tax prior to registering or titling the item in Wisconsin.

Example - Sale of Assets by a Business Which Has Ceased to Operate: Grocer ceases actively operating as a seller of any of the items listed in Part I.D.1. through 4. on page 7, or taxable services on June 1, 2012. Grocer sells its business assets (other than inventory) on July 1, 2012. Since the items Grocer is selling are personal property previously used in its business and Grocer has ceased operating at that location, the sale of the business assets by Grocer is exempt from Wisconsin sales and use tax as an occasional sale.

Example - Sale of Assets by a Continuing Business: Grocer holds a Wisconsin seller's permit and sells used shelving to Customer for \$1,000. Since Grocer holds a seller's permit at the time of the sale and is continuing to operate at the location where the shelving was located,

the \$1,000 is subject to Wisconsin sales tax.

2. Purchases of Equipment and Business Assets

Purchases of equipment and business assets which are stored, used, or consumed in Wisconsin are subject to Wisconsin sales and use tax. See Part I.E. on page 8 for the difference between Wisconsin sales and use tax.

Exception: If the seller of the equipment and business assets qualifies for the occasional sale exemption on its sale of such items, the purchaser does not owe Wisconsin sales or use tax on its purchase of the items. For information about the occasional sale exemption for sales of business assets, see [Publication 201](#), *Wisconsin Sales and Use Tax Information*, Part XV.

Examples of purchases of equipment and business assets which are subject to Wisconsin sales and use tax include the following:

- Refrigerated display cases, condensing units, and shelving systems
- Check-out counters, cash registers, and computer scanning systems
- Moveable display racks, office furniture, and material handling equipment
- Walk-in cold storage units that are not a component part of a building

Example: Grocer purchases a rack which will be used to display various products offered for sale. The purchase of the rack by Grocer is subject to Wisconsin sales and use tax.

F. Purchases of Supplies and Repairs

A grocer's purchases of supplies and repairs to any of the items listed in Part I.D.1. through 4. on page 7, used in conducting its business are subject to Wisconsin sales and use tax. If the grocer does not pay Wisconsin sales or use tax

to the supplier of the repairs and supplies at the time they are purchased, the grocer is liable for Wisconsin use tax on such purchases.

Examples of items which a grocer may purchase and use in their business and which are subject to Wisconsin sales and use tax include:

- Office and store supplies used by the grocer, including pens, pencils, paper, and cash register tapes
- Employee uniforms, including smocks, aprons, hair nets, and name tags
- Training materials, including tapes and manuals
- Cleaning supplies, including brooms, chemicals, and mops
- Advertising and display racks and signs
- Repairs to equipment and any of the items listed in Part I.D.1. through 4. on page 7, unless the equipment is exempt from tax (e.g., equipment used exclusively and directly in manufacturing)

V. COUNTY SALES AND USE TAX

Sales and purchases of any of the items listed in Part I.D.1. through 4. on page 7, or taxable services subject to Wisconsin sales and use tax may also be subject to the 0.5% county sales and use tax. For additional information on the county tax, see [Publication 201](#), *Wisconsin Sales and Use Tax Information*, Part XVIII.

Every person registered or required to be registered to collect and remit Wisconsin sales or use tax is also required to collect and remit the appropriate county sales or use tax, regardless of whether the person is “engaged in business” in those counties.

VI. BASEBALL AND FOOTBALL STADIUM SALES AND USE TAX

Sales and purchases of any of the items listed in Part I.D.1. through 4. on page 7, or taxable services subject to Wisconsin sales and use tax may also be subject to the 0.1% baseball stadium sales and use tax if the sale is made in Milwaukee, Ozaukee, Ra-

pine, Washington, or Waukesha county, or subject to the 0.5% football stadium sales and use tax if the sale is made in Brown County. For additional information on the baseball and football stadium taxes, see [Publication 201](#), *Wisconsin Sales and Use Tax Information*, Part XVIII.

Every person registered or required to be registered to collect and remit Wisconsin sales or use tax is also required to collect and remit the appropriate stadium sales or use tax, regardless of whether the person is “engaged in business” in the stadium district.

VII. LOCAL EXPOSITION TAX

Sales of food and beverages which are subject to the 5% Wisconsin state sales tax may also be subject to the 0.5% food and beverage local exposition tax if the sale takes place in a municipality located wholly or partially in Milwaukee County. For additional information about the 0.5% food and beverage local exposition tax, see [Publication 410](#), *Local Exposition Taxes*.

Every person registered or required to be registered to collect and remit Wisconsin sales or use tax is also required to collect and remit the appropriate local exposition taxes, regardless of whether the person is “engaged in business” in the local exposition district.

VIII. PREMIER RESORT AREA TAX

Sales of any of the items listed in Part I.D.1. through 4. on page 7, and taxable services subject to Wisconsin sales tax may also be subject to the 0.5% (1% for the City of Wisconsin Dells and the Village of Lake Delton) premier resort area tax if: (1) the sale, lease, license, or rental of any of the items listed in Part I.D.1. through 4. on page 7, or taxable services are sourced to a premier resort area, and (2) the retailer is classified in the Standard Industrial Classification (SIC) Manual, 1987 Edition, under certain SIC codes. For additional information on the premier resort area tax, including a listing of the applicable SIC codes, see [Publication 403](#), *Premier Resort Area Tax*.

Every person registered or required to be registered to collect and remit Wisconsin sales or use tax is also required to collect and remit the appropriate premier resort area taxes, regardless of whether the person is “engaged in business” in the premier resort area if the sale meets items (1) and (2) in the paragraph above.

IX. RECORDKEEPING

A. General

If you are required to have a seller’s permit, consumer’s use tax certificate, or use tax certificate, you must keep adequate records so that you, as well as the Department of Revenue, can determine the correct amount of tax due.

B. Records to Keep — Exempt Sales

If you claim that part or all of your retail sales of any of the items described in Part I.D.1. through 4. on page 7, or taxable services are not subject to Wisconsin sales and use tax, you must keep records to support the exemptions claimed.

The reason for keeping such records is because all sales are taxable until the contrary is established. The grocer has the burden of proving that a sale of any of the items described in Part I.D.1. through 4. on page 7, or taxable services is not subject to Wisconsin sales tax, unless: (a) the grocer receives an exemption certificate from the purchaser, or (b) the grocer has the other records and information as described in Part IX.C. 1 through 3 below.

C. Common Exemptions and Records Needed to Support the Exemptions Claimed

Common reasons that sales of any of the items listed in Part I.D.1. through 4. on page 7, or taxable services by a grocer may not be subject to Wisconsin sales tax and the records to keep to support the exemptions are as follows:

1. **Exempt Food Items** - Sales of certain foods and food ingredients and beverages for human consumption are not subject to Wisconsin sales tax. Although the grocer is

not required to obtain any information from the purchaser for these types of sales, the grocer must maintain records which support the amount of exemption claimed for sales of these types of items.

Note: Items 2 and 3 below apply only to sales and purchases of items other than exempt food and food ingredients and beverages as described in 1.

2. **Items Being Resold by the Purchaser** - Sales of items are not subject to Wisconsin sales tax if the purchaser furnishes the grocer an exemption certificate claiming resale or some other valid Wisconsin exemption. The grocer must keep the exemption certificate provided by the purchaser to support the exemption from sales tax.

Example: Grocer sells soda to Caterer. Caterer is going to resell the soda to its customers. Caterer must provide Grocer with an exemption certificate claiming resale to purchase the soda without Wisconsin sales tax.

3. **Sales to Governmental Agencies and Exempt Entities** - Sales to a Wisconsin or federal governmental agency, any federally recognized American Indian Tribe or Band in this state, or to a nonprofit organization that holds a certificate of exempt status (CES) number issued by the Wisconsin Department of Revenue are exempt from Wisconsin sales tax.

Sales to Wisconsin and federal governmental agencies, municipalities, and public schools may be supported by either: (a) a copy of the purchase order or similar written document identifying the governmental unit as the purchaser, (b) an exemption certificate, or (c) by recording the CES number on the copy of the invoice kept by the grocer.

Sales to nonprofit organizations (e.g., churches) must be supported by either: (a) an exemption certificate from the organi-

zation, or (b) by recording the CES number on the sales invoice kept by the grocer.

Note: If exemptions are claimed for any of the above reasons, the seller must keep the completed exemption certificates, purchase orders, invoices, or statements mentioned above to prove that the sales were not subject to Wisconsin sales tax.

D. How Long Must the Records be Kept?

Grocers must keep the records and exemption certificates to support the amounts reported and deductions claimed on the sales and use tax returns for a **minimum** of four years after: (a) the due date of the Wisconsin income or franchise tax return filed, (b) the dissolution of the business, or (c) the date any sales and use tax return required to be filed was filed, whichever is later.

Caution: If a grocer is being audited, any written agreement between a grocer and the Department of Revenue which extends the time period upon which the department is authorized to determine the correct tax liability of the grocer, also extends the time the records must be kept.

X. DO YOU HAVE QUESTIONS OR NEED ASSISTANCE?

If you have a question about Wisconsin sales and use taxes, email, write, or call the department.

Visit our website . . . revenue.wi.gov

Email . . . DORSalesandUse@revenue.wi.gov

Write . . . Wisconsin Department of Revenue
Mail Stop 5-77
PO Box 8949
Madison, WI 53708-8949

Telephone...(608) 266-2776

Fax . . . (608) 267-1030

You may also contact any of the Department of Revenue offices. See the department’s website for a [listing of offices](#) and their current hours.

A. Other Information

If you are required to file sales and use tax returns, you should be aware of changes in the tax laws, new interpretations, and court cases which may affect how you file returns and compute the tax. Informational type aids available to you include:

1. Sales and Use Tax Report

The *Sales and Use Tax Report* is published one or more times each year by the Department of Revenue. It includes general information about sales and use tax, including new tax laws enacted by the legislature. [These reports](#) are available on the department’s website.

Notification of new *Sales and Use Tax Reports* will be sent to subscribers of the sales and use tax [electronic mail list](#).

2. Publications and Fact Sheets

You may obtain the following [sales and use tax and other local tax publications](#) and fact sheets:

Publications

Number	Title
200	Electrical Contractors
201	Wisconsin Sales and Use Tax Information
202	Motor Vehicle Sales, Leases and Repairs
203	Manufacturers
204	Sales and Use Tax Information for Colleges, Universities, and Technical Colleges
206	Sales Tax Exemption for Nonprofit Organizations
207	Contractors
209	Sales and Use Tax Information for Wisconsin Counties and Municipalities
210	Landscaping
211	Cemetery Monument Dealers
216	Filing Claims for Refund of Sales or Use Tax

Number	Title
217	Auctioneers
219	Hotels, Motels, and Other Lodging Providers
221	Farmers and Farm Suppliers
222	Motor Vehicle Fuel Users
223	Bakeries
224	Veterinarians
225	Barber and Beauty Shops
226	Golf Courses
228	Temporary Events
229	Brackets for Collecting Wisconsin Sales or Use Tax Paid on Retail Sales
230	Sales and Use Tax Information for Sellers of Antiques, Crafts, and Artwork
231	Manufactured and Modular Homes
235	Advertising Companies
240	Digital Goods
245	Schools

405	Wisconsin Taxation of Native Americans
410	Local Exposition Taxes

Fact Sheets

2101-1	Exemption for Qualified Research (1-1-12 through 7-1-13)
2101-2	Exemption for Qualified Research (On and after 7-2-13)
2102	Exemptions Relating to Raising Animals Sold for Use in Qualified Research and Manufacturing
2103	Sales to Native American Tribal Members
2104	Use Tax

Notification of new and revised publications and fact sheets will be sent to subscribers of the sales and use tax [electronic mail list](#).

3. Wisconsin Tax Bulletin

The [Wisconsin Tax Bulletin](#) is a quarterly publication of the Department of Revenue which is available under the “[Publications](#)” tab. The Bulletin includes information on

most taxes administered by the Department of Revenue, including sales and use, income, franchise, and excise taxes. It includes up-to-date information on new tax laws, interpretations of existing laws, and information on filing returns. It gives brief excerpts of major Wisconsin tax cases decided by the Wisconsin Tax Appeals Commission and the courts.

Notification of new bulletins will be sent to subscribers of the sales and use tax [electronic mail list](#).

4. Rules - Wisconsin Administrative Code

The [Wisconsin Administrative Code](#) includes administrative rules that interpret the Wisconsin Statutes. Rules have the force and effect of law. The Department of Revenue has adopted a number of rules pertaining to sales and use tax.

A subscription and update service which provides all new Department of Revenue rules and changes to existing rules, may be purchased from Department of Administration Document Sales.

5. Topical and Court Case Index

The [Topical and Court Case Index](#) is a two-part index. The first part (a [Topical Index](#)) will help you find the particular Wisconsin Statute, administrative rule, *Wisconsin Tax Bulletin* tax release, private letter ruling, or Attorney General opinion that deals with your particular tax question. The second part of the index (a [Court Case Index](#)) lists Wisconsin Tax Appeals Commission, circuit Court, Court of Appeals, and Wisconsin Supreme Court decisions relating to your question.

6. Electronic Mail Lists

The Department of Revenue has several [electronic mailing lists](#) available to the public. The goal is to provide communication from the department to list members on in-

formation and news specific to the respective list they have signed up for.

XI. ANY SUGGESTIONS?

The Department of Revenue wants this publication to be as complete and informative as possible. If you have any suggestions to improve this publication, please either call or write to:

Wisconsin Department of Revenue
PO Box 8949, Mail Stop 5-77
Madison, WI 53708-8949
(608) 266-2776

ARE YOU SELLING “PREPARED FOOD”?

(This flowchart only helps you determine if the "food and food ingredient" (See Note 1) being sold meets the definition of “prepared food” provided in sec. 77.51(10m), Wis. Stats.)

STEP 1:

STEP 2:

Notes To “Prepared Food” Flowchart

1. "Food and food ingredient" means a substance in liquid, concentrated, solid, frozen, dried, or dehydrated form, that is sold for ingestion, or for chewing, by humans and that is ingested or chewed for its taste or nutritional value. "Food and food ingredient" includes beverages, but not alcoholic beverages. "Food and food ingredient" does not include tobacco.
2. Food and food ingredients are sold in a heated state if they are sold at a temperature higher than the room temperature.
3. A business' code under the North American Industry Classification System (NAICS) is based on that business' primary business activity. NAICS subsector 311 covers all food manufacturing businesses.
4. A business' code under the North American Industry Classification System (NAICS) is based on that business' primary business activity. NAICS subsector 311 covers all food manufacturing businesses and industry group number 3118 covers bakeries and tortilla manufacturing.
5. Bakery items include breads, rolls, pastries, buns, biscuits, bagels, croissants, donuts, danish, cakes, tortes, pies, tarts, muffins, bars, cookies, and tortillas.
6. For purposes of computing the 75%, the **numerator** is made up of the retailer's sales of food and food ingredients:
 - (a) That are sold heated;
 - (b) That were heated by the retailer but sold unheated, but not including:
 - The retailer's sales of bakery items,
 - Two or more food ingredients mixed or combined by the retailer for sale as a single item if the retailer's primary NAICS code is manufacturing under subsector 311 but not including bakeries and tortilla manufacturers under industry group number 3118, and
 - Two or more food ingredients mixed or combined by the retailer for sale as a single item and sold unheated by weight or volume
 - (c) Two or more food ingredients mixed or combined by the retailer for sale as a single item, but not including:
 - The retailer's sales of bakery items,
 - Two or more food ingredients mixed or combined by the retailer for sale as a single item if the retailer's primary NAICS code is manufacturing under subsector 311 but not including bakeries and tortilla manufacturers under industry group number 3118,
 - Two or more food ingredients mixed or combined by the retailer for sale as a single item and sold unheated by weight or volume,
 - Items that are only sliced, repackaged, or pasteurized by the retailer, or
 - Eggs, meat, fish, poultry or any food item containing them in raw form that requires cooking by the consumer.
 - (d) Food and food ingredients for which plates, bowls, glasses, or cups are necessary to receive the food and food ingredients.

The **denominator** is made up of all of the retailer's sales of food and food ingredients.

7. Serving sizes are based on the information contained on the label of each item sold, except that if the item does not contain a label, the serving size is based on the retailer's reasonable determination.
8. Utensils are not considered to be “made available” by the retailer to the purchaser solely by virtue of a utensil being placed in the package along with the food item by a person other than the retailer. “Utensils” include napkins, straws, forks, spoons, knives, plates, bowls, glasses, and cups.
